Make It Your Own: Printing & Paper Options

Tiny Dog Press specializes in letterpress and digital/flat printing, but you have other options to consider as well:

- Digital / Flat Printing
 - Casual to mid-price range
 - Good design communicates higher end quality
 - Cotton paper versus tree-based card stock
 - *Example:* [Tiny Dog Press](#) (This wedding invitation suite can be printed either using letterpress or digital printing methods. This listing is for letterpress printing.)
- Letterpress
 - Debossed / pushed into the cotton paper
 - Mid- to high-end event
 - Each color is a separate run through the printing press
 - *Example:* [Tiny Dog Press](#)
- Mix of Letterpress & Digital
 - You can digitally print on cotton paper a design, photo, etc., and then letterpress print the text.
 - Letterpress print your wedding invitation then digitally print all of the additional items to help save money!
- Thermography
 - Casual to mid-price range
 - Raised type and design
 - Created through digital printing with a special ink (After printing, the ink is heated, causing it to rise on the page. This gives the ink a stiff and slightly plastic feel.)
 - Current trends has this printing method not highly available
 - *Example:* [Carlson Craft](#)
- Engraving
 - Traditional wedding invitation printing method
 - Mid- to high-end event
 - Raised text and design with sharp edges and matte ink
 - *Example:* [Crane & Co.](#)
- Hand Written
 - Small intimate wedding
 - Personalized to each guests
