- art mentioned above. Heating indicator light at iron unit lights up to indicate the unit is ing heated up. When the heating indicator light turns off, the desired temperature s been reached. It is ready for steam ironing. During use, heating indicator light cycle on to off, (For every first time use, please pre-heat for 3 minutes) are every first time use, it is proposed to clean iron unit as following methods: Take on up from the base unit, press steam release button underneath the handle to Note: When the water level reaches a low level or empty, pump will make a sound to remind you it needs refilling. Then stop using the appliance immediately and refill water
  - allow steam ON for **30** seconds, and then OFF for 30 seconds, this cycle should be repeated for 2 times. When heat indicator light turns off, it is ready for use. During steam ironing, please adjust steam rate according to your requirement as indicated in the steam selection.

1. Fill water tank with clean water as above filling instruction. For better performance,

8. Set temperature control knob to steam ironing position according to fabric setting

please immerse the filter in water for several minutes before installing it into the water

2. Connect the appliance into a suitable socket outlet. Lay down handle and press down the power switch on the control panel. Water tank decorative indicator light lights up to indicate that the unit has been connected to the power supply

a. For every first time use, it is normal that a slight vibration sound may be heard from electrical pump inside the base unit for a few seconds when steam ironing started. It is because there is air inside the filter, it will stop when the air inside the filter has been pumped out. Press and HOLD the trigger for up to 30 seconds. If necessary hold the iron hand unit below the base. This clears any air locks more quickly
b. When the temperature control knob is set at " ● [SYNTHETIC]" position, no steam is produced as it only suits dry ironing. When set at " ● [WOOL/SILK]" or " ● ● [COTTON]", "MAX", steam will automatically vary according to soleplate temperature.
