Two Ways to Keep your Phone or other Device Dry

Our phones have become an extension of us. We don't go anywhere without them, and we use them for everything. So it goes without saying that waterlogging your phone is a bad thing. Besides the inconvenience, these mini-computers are no longer cheap to replace!

So how do you protect your phone while using it on a motorcycle? Here are two fool-proof ways:

#1: Caddy Buddy

The Caddy Buddy is made of a vinyl material with a harder 'backing' sewn in for support. It has a slim, unobtrusive profile and the clear cover allows you to operate the phone's touch screen through it. The back side features a swivel mechanism so you can tilt/angle the phone, with both vertical and horizontal options. See more:

#2: Hydra Waterproof Case

The Hydra case has zipper closure on three sides. It has a special waterproof 'plug' to run wires out if needed and is available in several sizes. The Hydra also has a swivel mechanism connecting it on the back so you can tilt/angle the phone, with both vertical and horizontal options. See more:

Both the Caddy Buddy and the Hydra can be mounted in a variety of locations: handlebar, brake/clutch, mirror stem, windshield and more. So you can always get your phone in a position that is easy for you to see and read, yet protected from the rain!

About Leader Motorcycle Accessories

Leader Motorcycle's mission is to make riding safer and more comfortable and convenient. Our Gadgets division specializes in mounting kits for GPS, phone, camera and more. Our Cold-Weather division manufactures the Desert Dawgs rain guards to keep riders warm and dry. **Manufacturing in the USA!**
