

For Immediate Release
July 14, 2016

News Release: Super-Tall Camera Mount (includes “LIVE” Video)

The Swivel-CAM Motorcycle Camera Mount was designed to provide:

1. a multitude of angles to shoot from
2. secure ‘lock down’ capability with anti-vibration features; and
3. a classy look unmatched by other motorcycle camera mounts

And now – thanks to customer requests – it is available in a **“Super Tall”** option! The Tall Swivel-CAM Mount gives you 6.2 inches of rod (overall height depends on how you angle the swivel components).

(The Swivel-CAM is also available in a 1.4-inch “shortie” and a 4.9-inch Medium.)

Thanks to our patented design, the Swivel-CAM addresses some key issues riders have told us about:

- **Extreme Angle Ability:** 360-rotation and Ultra-Swivel at top and bottom provide a huge range of positioning
- **Aesthetics:** Ultra-slim rod gives the mount a classy, streamlined look
- **Universal Fit:** Works with any camera with tripod threading – including popular action cameras like the GoPro
- **Anti-Vibration:** Anti-vibration features are built in

Does it really work? See for yourself! Watch this on-board video, taken with our GoPro and the Swivel-CAM Mount:
