Product Catalog 2015/2016

About Us

Happycall USA Corporation ("Happycall USA"), a subsidiary of Happycall Co., Ltd. headquartered in South Korea, established in the United States in the heart of Los Angeles, California since 2012. Our goal is to market the Happycall brand in North, Central, and South Americas through effective advertising and distribution of its products known for high quality in many countries such as Japan, Korea, Singapore, and Brazil.

We executed well devised strategies for our competitive Market. Happycall USA has streamlined its business model by establishing its own distribution in the United States. We are pleased to offer high quality products at a reasonable price to satisfy a diverse range of US customers. Happycall USA understands the importance of brand awareness and brand building and that is why we focus our efforts towards effective methods such as social marketing, offline distribution, and TV home shopping to increase brand awareness. Along the same lines, we continue to develop strong partnerships both on-and offline to increase distribution. By being the link to our overseas manufacturing facilities, we are able to custom-tailor to customers' needs.

We are not done. Innovation never stops and neither does Happycall. Our team of experts are fully dedicated in gathering consumer insight, conducting market research, and developing new products. Listening to our customer is key to our success.

"We will not release a product into the market without proof that it will revolutionize the way people cook."

-Hyun Sam Lee, CEO and Founder

Hard Anodized Ceramic Pot

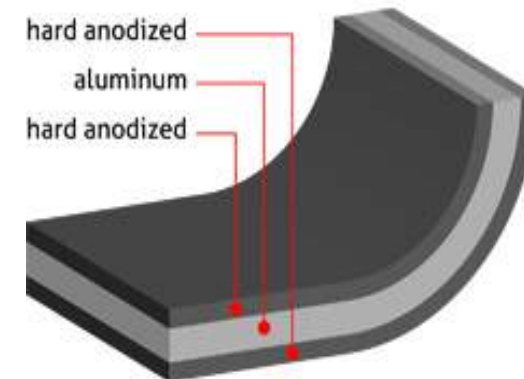

Hard Anodized Ceramic Pot After carefully machining cast aluminum, weight is kept to minimum while taking strength, durability, and finish to the next level through hard anodizing. Natural ceramic finish inside and out for easy cleaning maintenance. Includes a self-standing tempered glass lid, standard with a wide steam vent.

Hard Anodized Ceramic Pot

High-tech Hard Anodized Special Method

Through an 8-phases process, the Hard Anodized coating provides high anti-corrosive properties and durability.

High Purity Ceramic Coating

The high purity ceramic coating makes the product strong, scratch resistant, and most importantly, erosion proof. Ceramic is also hygienic because of its simple cleaning properties

Self-Standing Lid with Auto Steam Valve

The automatic steam control lid is equipped with a steam valve that prevents overflow. The handle includes a self-standing function, ergonomic features, and a modern design that adds sophistication to any kitchen.

Hard Anodized Ceramic Pot

Hard Anodized Ceramic Pot Big Set

SKU: 3900-2009
 (2Qt, 3Qt, 3Qt wide, 4Qt, 6Qt, 11" Steamer, Potmate Pair)

IH Vacuum Pot

Unlike a regular pressure cooker, the IH Vacuum Pot can be easily opened and closed while cooking. Lock the lid on the pot after cooking. As food cools down, an airtight "vacuum state" is created. This sealed state helps food to continue cooking within its own moisture and remain fresh for a longer period of time.

IH Vacuum Pot

Vacuum Control Valve

A Special one touch silicone vacuum control valve can be operated with one hand and automatically controls steam to cook more conveniently. The Vacuum Pot creates an airtight space to more efficiently cook food with steam and enhance taste.

Handle lock

Supplementary locking system sliding to lock or unlock easily without a leak.

High-tech Hard Anodized Special Method

The Hard Anodized method provides high anti-corrosive properties coupled with strong durability. It also applies high purity ceramic coating so it protects against scratches and abrasions. It is also easy to clean.

Silicone Gasket Lid

The special silicone gasket makes the Vacuum Pot airtight allowing food to be stored without a leak and without losing flavor.

IH Vacuum Pot

Direct Gas Fired Oven

The Direct Gas Fired Oven helps you cook food thoroughly via an innovative convection system. Due to its scientific design, the stovetop oven reduces worries about splashing oil, smell and smoke. Tender & crispy food easily with the portable Direct Gas Fired Oven anywhere.

Direct Gas Fired Oven

Glass Lid With Convection Heat Cycler

Cooking with convection heat not only removes the need to turn food over, but also allows food to have a crispy outer texture, sealing in precious juices inside, great for roasting.

5 Layer Non-Stick Diamond Griddle

Equipped with the ultimate diamond non-stick coating, the grill plate displays the best non-stick properties resulting in easy cooking and cleaning. It is also equipped with grain slots allowing unwanted fat to drain into the reservoir below.

Turbo Safety Dome

The turbo safety dome safely funnels heat from the flame below into the oven. Its second purpose is to shield the flame from grease splatter, allowing peace-of-mind when cooking.

[Extra] Bake Tray

Great for casseroles, pastas, brownies, and cakes.

3Ply Stainless Steel Pot

The product is produced in the 3-ply structure of the clad method, with the combined merits of stainless steel and aluminum processed to both the bottom and side faces. Thanks to this structure, the pot can thoroughly and quickly cook food with the help of its triple thermal storage effect through thermal radiation.

3Ply Stainless Steel Pot

2Qt Stainless Steel Pot

SKU: 3003-0042

6Qt Stainless Steel Pot

SKU: 3003-0045
 Inside Diameter: \varnothing 240 / 6Qt
 Overall: 254*361*H140 (w/o lid)

Cookware Symbols

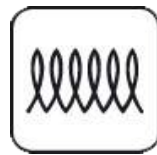

Maintenance

This symbol indicates that a product can be cleaned in the dishwasher.

Source of Heat

Induction is very energy-efficient and fast. If you want to check if your cookware is induction-ready, simply hold a magnet to the base. If it sticks, your cookware is suited for induction.

The cookware can be used on a gas hob. Gas offers instant control over the heat, responding directly to settings of the gas stove.

Vitro ceramic cooktops use a radiant element to heat to ingredients in the pot.

The cookware can be used on a traditional electric hob.

Material

This indicates a product with a non-stick layer that is free of PTFE and PFOA. In other words, it's an all-natural, non-toxic coating.

The lid that comes with the cookware carrying this symbol is made from glass having the benefit that you don't have to lift the cover to see what's going on inside the pot.

The layer of this cookware is non-stick, allowing you to use less (or even no) fat while cooking.

Features

With this icon, you know that the tool can go into the oven.

Bold Innovation

"We believe in innovation", founder and CEO Hyun Sam Lee. "We will not release a product into the market, without proof that it will revolutionize the way people cook."

Mr. Lee Executed flawlessly in creating our first product, The Happycall Double Pan. Innovative dual pan construction, packed with original features. From the use of FDA approved silicon by Dow Corning Corporation to reduce oil splatter and smell, The Double Pan prioritizes thermal conductivity to save on energy and includes premium quality coating for easy cleaning, practicality, and safe use.

Research & Development

Our top four engineers possess 150 years of experience. We dare to use unconventional materials for cookware in order to achieve the highest quality. While incorporating advanced manufacturing processes to make durable long lasting cookware.

Fine example is in our line of Hard Anodized Ceramic Pots, a corrosion free, coated with premium quality ceramic for lasting beauty.

Globalization

Happycall Headquartered in Korea experienced rapid growth in the cookware industry since 1999. Our efforts have established presence in the United States, Canada, Brazil, Japan, Thailand, Indonesia, China, and over 40 different countries. We've acquired knowledge of different culinary cultures, while improving our own products to a whole new level of quality, innovation, and excellence.

"I strongly recommend using this company... The product is fantastic."

-Ms. Tombrello, AL (3/8/15)

"Product came very nicely packaged. Works like a pressure cooker. Love it!" (a review of Double Pan)

-Ms. Schwartz, PA (3/30/15),

"Great, Great!! Safe, efficient, with the best possible results. Whatever you put inside you get the best results ever. Everything is evenly done, simple."

-Avraham (9/7/15)

"Great Product!! Exceed expectation. Cook eggs like sliding on the ice." (a review of Diamond Frying Pan)

-Ms. Wen, CA (5/14/15),
