

# TUFFSPIGOT

## SPECIFICATION GUIDE

### PRODUCT DESCRIPTION

Composite spigots remove the necessity of earth/bonding work that needs to be completed when installing conventional metal spigots when they are close to the waters edge of the pool. The TuffSpigot is designed specifically for onground glass fencing applications and due to it's non-conductive composite construction, does not require earthing under AS/NZ3000:2018 equipotential bonding.

### SPECIFICATION

MODEL NAME: TuffSpigot

MODEL NUMBER:

DIMENSIONS:

WEIGHT: 3 kilograms ( oz)
