## Product Information

Most of Bohemio Furniture products have been handcrafted using traditional carving and joinery techniques. Whilst we take great pride and care in our products, these pieces may have some subtle knots, indentations, splits, cracks, chips and other superficial imperfections. Such as look is part of the charm and appeal of the hand crafted plantation and/or recycled timber product.

As timber is a natural product, it may experience movement from atmospheric changes that are outside the control of the manufacturing process. The wood used is generally available in the country of origin and not subject to depletion. This is due to the country's government and NGOs, like the Global Forest and Trade network, which support reforestation schemes while providing economic and social benefits to the people that depend on them.

## Care Instructions

- Always avoid direct sunlight and consider room ventilation, heat and humidity levels which could cause natural movement in timber and/or joints.
- Wipe off spills immediately and always use coasters or table mats.
- Do not place any hot objects directly onto the surface. For example, pizza cartons and hot pans. Discolouration to the furniture could occur due to the wax surface reaction to excessive heat.
- Dust and clean with a dry soft cloth. Do not use a damp or wet cloth or cleaning products with chemicals in them.
- Use beeswax to wax and buff at least every 6 months to keep the rich look and condition of the timber. The more you do it the better it is for the timber, so do it as often as you like as you cannot over do it.

As all of our timber products are made from quality hardwood, we hope you enjoy your purchase for many years to come. Thank you for choosing our range of unique hand made furniture and we hope to see you again soon.
