CAST STONE COLLECTION

Campania employs a talented group of artists who create original copyrighted designs that blend old world traditions with a uniquely American sensibility. They are designed by hand, molded by hand, poured by hand, stained by hand, and packaged by hand.

Campania's cast stone pieces are manufactured with a high density cast stone mix, resulting in a PSI (pounds per square inch) strength of approximately 7,500. The natural materials used in our mix are sourced locally. Our cast stone products can qualify for LEED MR 5.1 and /or MR 5.2 credits as applicable to your project.

All of our cast stone products are available in 13 exclusive patinas in addition to natural cast stone. We hand apply each patina in a multi-step process. Our patinas are designed to replicate the look of naturally aged materials and will not prevent the natural aging process. Any cast stone item with a patina

CAMPANIA CAST STONE FOUNTAINS

- Hand-made in the USA by Campania
- High density 7,500 PSI cast stone
- Natural materials locally sourced
- Can qualify for LEED MR 5.1 and MR 5.2 credits
- Strong and durable for outdoor use
- Ages naturally over time
- Available in 13 exclusive patinas and natural (no patina applied)
- Many Sizes and Design Options: Traditional, Classic, Contemporary, Modern, and Transitional Styles
- Estate size fountain and basin systems, wall fountains, garden fountains
- Auto-refill devices, lights, and fountain covers available through Campania
- Pump Kits included

CAST STONE FOUNTAIN GENERAL CARE

Always place any Campania product on a solid level surface and not directly on grass, soil, or an uneven surface.

Proper winter care is recommended for all Campania cast stone fountains for protection in environments with potential freeze-thaw cycles.

- Drain Fountains and make sure the basins are completely dry.
- If possible, remove pump, rubber stoppers, drainpipes, finials, and other small components for storage indoors. Note that stoppers or drainpipes are removed to allow drainage in the event water accumulates in any basin.

If this is not possible

- Cover fountain with an appropriately sized fountain cover, available from Campania, making sure that water will not accumulate in the basin or other fountain components and freeze.
- Check fountain periodically to ensure the cover is secure and water is not accumulating in any fountain component.

Any cast stone item with a patina will weather naturally in an outdoor environment.

Our full collection of cast stone pieces include: planters, urns, pedestals, large estate fountains, wall fountains, garden fountains, tables, benches, garden statues, Asian accents, finials, birdbaths and other

CAMPANIA CAST STONE PLANTERS

- Hand-made in the USA by Campania
- High density 7,500 PSI cast stone
- Natural materials locally sourced
- Can qualify for LEED MR 5.1 and MR 5.2 credits
- Strong and durable for outdoor use
- Ages naturally over time
- Available in 13 exclusive patinas and natural (no patina applied)
- Many Sizes and Design Options: Traditional, Classic, Contemporary, Modern, and Transitional Styles

CAST STONE PLANTER GENERAL CARE

Always place any Campania product on a solid level surface and not directly on grass, soil, or an uneven surface. Proper winter care is recommended for all Campania cast stone planters for protection in environments with potential freeze-thaw cycles. If a planter is to be left planted over the winter, ensure proper drainage by 1.) Placing a layer of coarse gravel or other appropriate drainage material in the bottom of the container, and 2.) Making sure the drainage holes are not blocked. If the planter remains in contact with the ground surface over the winter, the freeze-thaw cycles may cause the planter to crack or crumble.
