

Timed to Perfection

THE WATCHES OF CHRISTIAN DIOR ARE
BEAUTIFUL, PRECISE, ENDURING

When the haute couture legacy of Christian Dior is paired with Swiss watchmaking perfection, timepieces are created that are as beautiful as they are technically accomplished.

Dior watches are designed in the Parisian headquarters of the iconic fashion house. Then the expert craftsmen at the Manufacture in La-Chaux-De-Fonds in Switzerland bring the designs to life. Made in small series, the watch collections are the epitome of luxury. And in Colorado, the timepieces are exclusively available at Oster Jewelers of Cherry Creek North.

Among the newest collections is the award-winning **GRAND BAL**, which embodies passion and the artistic freedom of Dior. Combining Italian rooster feathers with precious stones and gems set in the dials, each piece takes on a life of visual and technical accomplishment.

Color has always been one of the key codes of Dior. This year sees the introduction of a new **LAD DE DIOR** with a rich malachite dial. The naturally radiant green gemstone perfectly complements the 18-karat yellow gold bezel set with diamonds and a Florentine, vintage-style steel bracelet.

Discover how Dior constructs a device that transcends time, yet also measures it.
