

## 6G SERIES

The Deutz-Fahr 6G Series of tractors were completely designed from the ground up by the German engineering team. The design brief was to create a tractor for Australian conditions to be built in Germany. The combination of a six cylinder Deutz engine matched with the highly efficient German ZF transmission and class beating hydraulics creates the 6G PowerVision.

POWERSHIFT

**RC-SHIFT** 

The choice of six models with power outputs from 147 to 203 hp, hydraulic steer precision options and factory fitted Stoll loaders answers the demands of customers wanting maximum productivity, unparalleled ease of use and simplified maintenance.
