SPLURGE OR SAVE

A cool color that's getting hotter

BY MEGAN McDONOUGH

Nina Bruun is a Copenhagen-based designer who works in trend forecasting. Color is always on her mind and in her work.

“Color is the best way to reflect your personality in your decor,” Bruun says. “It’s always amazing when people dare to bring colors into their home.”

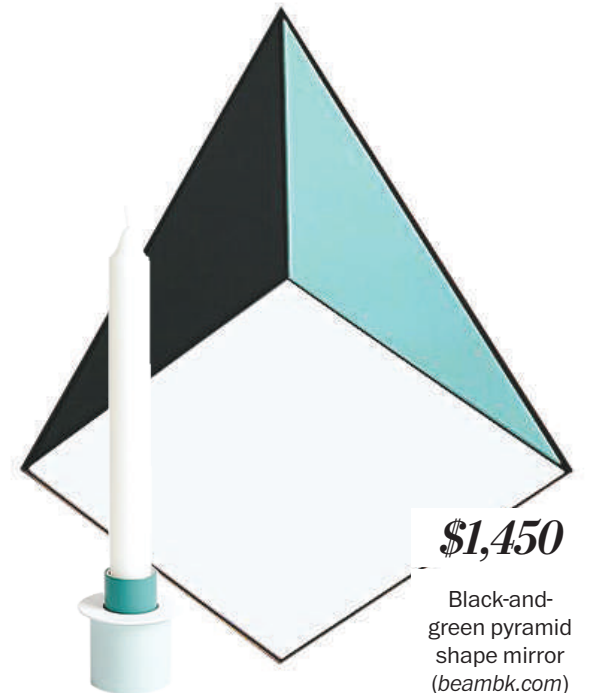

We asked her for some daring choices in the on-trend color green.

“Green is here to stay,” Bruun says. “With green, it’s possible to create so many different moods in your home. By using the bright green, you will get a fresh environment, but if you go for the darker saturated color, you will get a more bold and extravagant feel.”
