

# CUSTOM EAR IMPRESSIONS

## Impression material

- We require a custom ear impression from silicone based material, preferred material is Dreve 2-part mixture if possible.

## Open Jaw Impressions

- The impressions must be taken with an open jaw, please use a bite block at the time of taking the impressions & leave in until material has completely set.

## Full Shell Impressions

- Please ensure that the impression is taken of the full ear, **PAST THE SECOND BEND** is very important.
- Please try to avoid gaps or bubbles in the bowl of the ear.
- Detail in the Cymba & Helix
- Detail above the Tragus
- Extra material on the outside of the ear (imagine where and over the ear cable would sit)

## Ear Impression Example

Customer:

Please clearly name your impressions & send the impressions to:

**HW Audio**  
**Thames Innovation Centre**  
**2 Veridion Way**  
**Erith**  
**DA18 4AL**
