

Drop to Floor / Drop It

Easiest way to place object on the Cinema 4D grid or place it on a other object

HB Modeling Bundle

A series of scripts that will simplify the Cinema 4D modeling workflow

Instant Meshes

Separate program that will retopologize complex 3d scans

CV Artsmart

Plug-in that will let you import Illustrator files or even link them

CV Import Images

A fast way to import bitmap files and place them on certain objects

CV Layercomps

Easy way to work with Layers without the hassle of unassigned objects

CV Spline to Objects

Helpfull objects that let you parametric change the outline of chamfer of a spline

Selection Supplementals

Easy way to make random or repetitions of polygon selections

Reeper

Plug-in that makes ropes out of splines

Perfect Split

Plug-in that turns selected polygons into a new object, and also sets the Pivotpoint in the center (please also look at Advanced Poly Split!).

Magic Merge

Plug in that works like a instant boolean

Coons Mesh

CAD way of creating surfaces between splines

Riptide Pro

Importing MDD files into Cinema 4D

GSG Transform

Animating in simple MoGraph manner (Sorry I screwed up that one in the demo, my bad)

Magic SlowMotion

Create slow motion in Dynamics Simulations

Gelantine

Simulate overshoot/overlap in animation

Turbulence FD

Clouds, Fire and Smoke!

Publish 4D

Export PDF from Cinema 4D

Griptools.io

Control parameters inside Cinema 4D with a external device

Not shown at presentation (but still worth a look)

UV to Object

Brings a UV mesh to the scene as a polygon object

Edgeshade

Rounds of edges of objects with a normal map

Dem Earth

Assign coordinates from Google Maps to create a heightmap form the area as well as downloading satellite images

Infinte Ocean

Create a infinte ocean inside the view of the camera

Hot 4D

Create a water Surface

And now some shameless self-promotion: C4D PlugInfo on Vimeo

Some of you mind already know that I have a Vimeo Channel of Cinema 4D Tutorials (<https://vimeo.com/user4455982>). I am going to expand the CyBear account with Vimeo Channel called "C4D PlugInfo". Just as the name suggests, I will give a unbiased review of Cinema 4D plug-Ins that are really usefull for the C4D pipeline. Any suggestions are more then welcome.
