

### ALL WEATHER

Weatherproof gaskets work in all weather conditions with a temperature range of -65 to 450 F.

### 100% GUARANTEE

If you are not 100% satisfied with your order you can return it for a full refund within 90 days.

### MADE IN THE USA

All of our products are manufactured and inspected right here in the good 'ol USA to ensure quality control.

## TRUSTED BY INSTALLERS EVERYWHERE

Weatherproof Gaskets can be installed into plug connections to keep rain and other elements from tripping your GFCIs. Plug Covers can be installed into any open-ended, female plug. This unique design allows Plug Covers to be used in 2 or 3 pronged plugs. When used in conjunction, Weatherproof Gaskets & Plug Covers will assist your GFCIs. Keep your lights aglow, even with rain, sleet or snow. These soft, pliable gaskets and hard, plastic covers will save you hours of time and frustration. Our products have been tested while submerged in water for 72 hours without tripping the GFCI.

### TONS OF USES...

Weatherproof Gaskets & Plug Covers are not only good for Christmas lights but can save you time and money in a number of applications. Here are just a few ideas...

- Christmas Displays
- Hydroponics
- Outdoor Events
- Landscape Lights
- Around Ponds
- Construction Sites
- Farming Equipment
- Plant Nurseries
- Breweries
- Parade Floats
- Campgrounds
- Many, Many More

# INSTRUCTIONS FOR USE

## WEATHERPROOF GASKETS

- 
- 1) Clean and dry all surfaces
  - 2) Place Weatherproof Gasket on male fitting
  - 3) Press together firmly

## WEATHERPROOF PLUG COVERS

- 
- 1) Clean and dry all surfaces
  - 2) Place Weatherproof Gaskets on Plug Covers
  - 3) Firmly push into female plug
  - 4) Remove ground prong if needed

## Important things to note...

- 1) Weatherproof Gaskets and Plug Covers can be washed & re-used multiple times.
- 2) Weatherproof Gaskets and Plug Covers can be used with both 2 and 3 pronged plugs.
- 3) Even in very cold weather, Weatherproof Gaskets will remain soft and pliable.
- 4) If you are still having problems with the GFCI tripping after using Weatherproof Gaskets and/or Plug Covers, double check you are using extension cords rated for outdoor use. Also make sure you aren't overloading a single circuit. If your breaker trips, contact a licensed electrician.
- 5) Don't discard the third prong. You can break off the ground prong and use it with a Weatherproof Gasket to seal off the open, female ground hole in the first strand of the series that you plugged into the extension cord. Visit our website for more information on how to use the third prong.
- 6) If you have ANY issues or questions about our products please don't hesitate to call us at 800-760-7135 or visit us on the web at [aplugpro.com](http://aplugpro.com).
