

The Genius Compact Loaded With Highlighter AND Mattifier

SKIN | 05.12.14 by Lexy Lebsack

SHARE IT

Upon first inspection, this compact may look like a run-of-the-mill blush and bronzer duo, but in actuality, appearances can be deceiving. In fact, it's one of the smartest products we've tried this year.

One side of Make Colour's [Custom Finish Matte/Dew Compact](#) (\$27) is a creamy mattifier you can apply anywhere you want a shine-free finish, like your nose, T-zone, or chin. It glides onto skin easily, soaking up oil and delivering a satin finish immediately. The other side is a peachy highlighter that can be dabbed anywhere that you do want shine, like the top of your cheekbones, your cupid's bow, eyelids, brow bone—even your lips. Plus, it's sparkle-free, so it works for day or night. Perfect, glowing skin just got easier.
