## GET GLOSSY

1 YEAR AGO by ALEX

Glossy lips I know, but a glossy brow?

After seeing the look on the Carven runway I decided this was a look to test immediately. I gave my brows a little brushing and reached for a tube of Make Beauty's **Face Gloss**. A few swipes across my brows and there they were, fully glossed and super shiny.

My only concern with this look, much like with lip gloss, is a windy day (without fail, at some point, my hair will get stuck to my lips). Although, if you do gloss your brows and the wind blows... you might have **that Marni look** on lock.

On a wind-free day, I'm all for it.
