MAKE Succulent Skin Gel

Perfect for taking along on your seaside/poolside bachelorette party to soothe over-sunned skin (or just for a little reprieve from the sweltering NYC subway), the MAKE skin gel harnesses the natural power of succulents to soothe, hydrate, and detoxify skin against pollution and the elements. Blends of cactus extracts (aloe vera and prickly pear) and healing herbs (chamomile, calendula and comfrey) work together to nourish

cells and optimize skin health. An ultra-lightweight, non-sticky, and fast-absorbing formula, the Succulent Gel helps hydrate, nourish, and repair to keep skin youthful and glowing—a vitamin and anti-oxidant rich blend of natural ingredients returns skin to a state of healthy equilibrium, soothing skin after heat exposure. And you'll feel good knowing 10% of sales are donated to the We See Beauty Foundation, a nonprofit organization dedicated to supporting women-led, worker-owned businesses in needy communities. Pro-tip: keep it in the fridge during the summer for an extra dose of cooling power.
