FACE GLOSS

GLOSSES THAT HIGHLIGHT AND DEFINE THE FACE, WHILE ALSO BRIGHTENING THE SKIN WITH A DEWY EFFECT

■ WHAT'S IN NOW

CREAM-BASED HIGHLIGHTERS

■ WHAT'S NEXT

MULTIPURPOSE, HIGH-SHINE FACE GLOSSES

Thicker in nature than highlighting creams and luminizers, face glosses are meant to be worn anywhere on the face for **a dewy, high-shine look.** Like lip gloss for your face, these multifunctional glosses can be used wherever you would use a traditional highlighter, and they work well on your lips and eyelids, too.

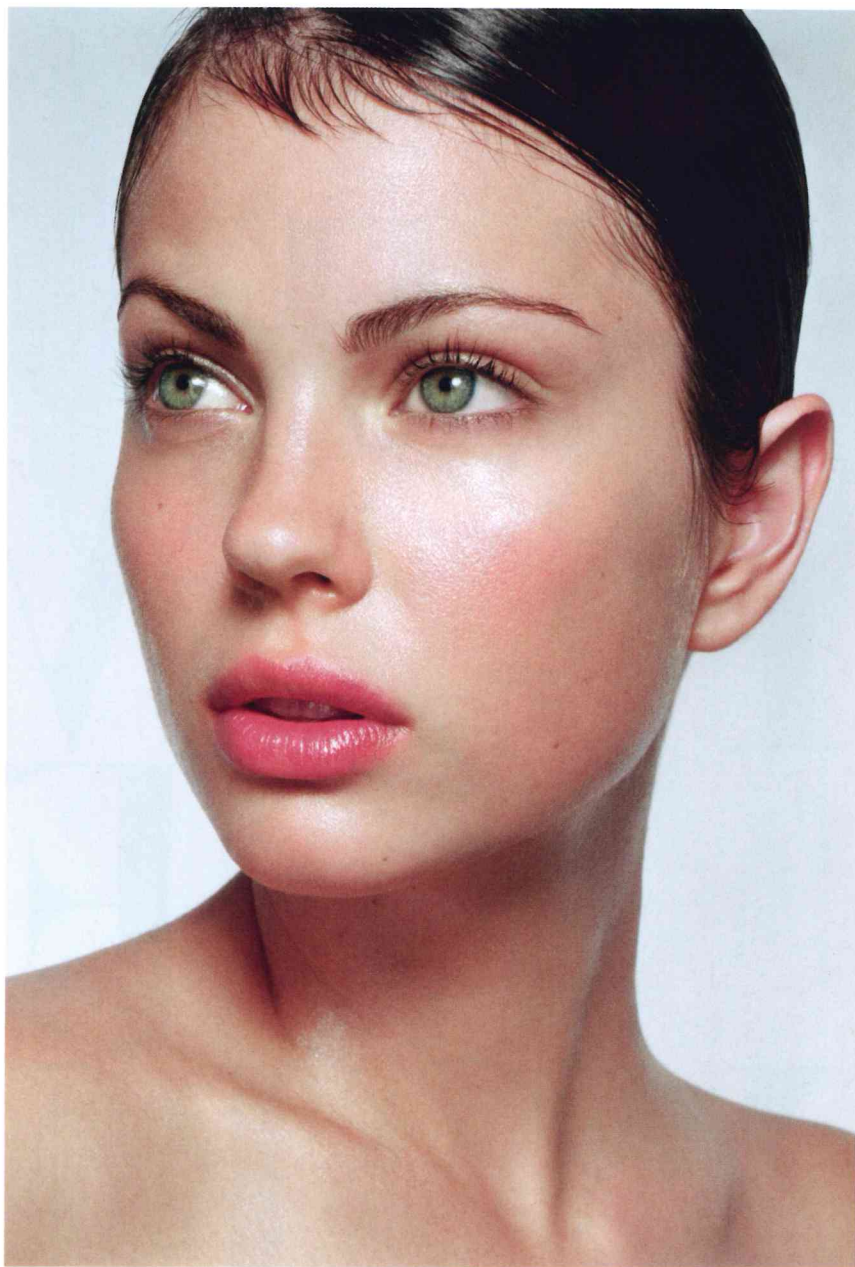

Whereas highlighters have more of a pearlized, luminescent finish, face glosses give more of a clean shine to the skin.

HOW TO WEAR IT

Celebrity makeup artist Katie Jane Hughes says to press the gloss all over the high points of your face. "It looks amazing with a bold red lip and groomed eyebrows," she adds.

WHAT THE EXPERT SAYS

"I really love the intensity of these, which are soft and subtle to bring on a glow," says Saraf. "Use them all over, especially on your cheeks, lips, eyes and collarbone."

Mirror-Like Shine

Kevyn Aucoin The Exotique Diamond Eye Gloss, \$38, barneys.com

Currently available in three shades—a pearlescent white, a shimmery clear and a gold-flecked black that goes on more like gray—the cool thing about these nonsticky glosses is their versatility. Wear them on your eyes, lips or cheeks, or layer them over other makeup when you want a glossy, runway-ready look.

What we say: The perfect way to top off your lipstick for added shine and dimension, this gloss also looks beautiful when dabbed on the high points of your face for a radiant effect.

Skin That Gleams

MAKE Dew Pot Bronze, \$20, makebeauty.com

Dab this bronze-colored gloss anywhere on your face where you want it to glisten with a hint of subtle color, like your lips, cheekbones and brow bone—it adds dimension without calling unwanted attention to large pores and other imperfections.

What we say: Not only does it give skin a beautifully reflective sheen, but it's also chock-full of antioxidants for a dose of environmental protection, too.
