[Make Beauty Brow Pen:](#)

Most women won't go out of the house anymore without their eyebrows somewhat done. But when you're not putting on a ton of makeup, it's easy to over-or-under-do your brows. You want them to look filled in, but you don't want them to look *too* filled in, because an Instagram brow with an all-natural face looks way too stark. This Brow Pen is the perfect compromise. It's as straightforward as it seems, with a felt tip on the end to dispense product that will make your eyebrows look full without looking like you fussed with them. It's also practically mess-up proof, so you won't have to spend time fixing them.
