RING SIZE GUIDE

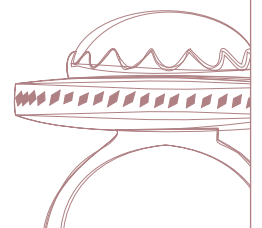

The easiest and most accurate way to measure your ring size is to consult your local jeweler: we'd advise visiting in the evening, when your fingers are typically thicker, and avoid measuring when you are cold, since your fingers will be at least half a size smaller. For accuracy, your jeweler should measure your finger 3 or 4 times.

If you do not have access to a jeweler, please print the next page and follow our guide carefully.

International Ring Size Conversion:

If you are ordering from outside of the US or Canada, determine your ring size according to your country's standard, and use our International Ring Size Chart below to convert it to the US standard we use.

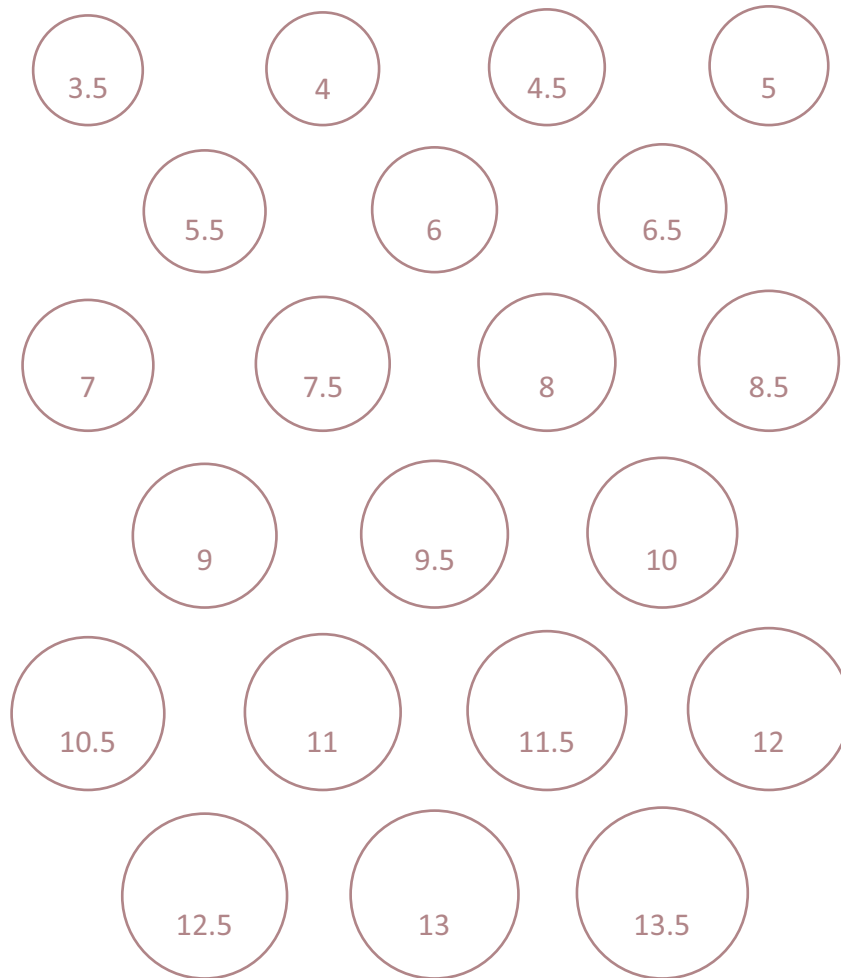

1 Choose a ring which fits your finger well

2 Place the ring over the circles below, matching the inside edge of the ring to the circle nearest in size

3 If the measurement falls between two sizes, order the larger size.

Note: to print, please make sure the Page Scaling is set to 'none' on your print dialog box
