

Gus*

PET Upholstery Fill

Gus* is proud to introduce a revolutionary new upholstery fill material in select sofa designs. PET fill is a clean, ultra soft, long-strand fiber material that offers the comfort and feel of traditional waterfowl down, achieved through a process that benefits the environment by diverting plastic bottles away from landfills. The bottles are purified and refined in several stages to create a synthetic-down upholstery fill that gives long-lasting comfort while maintaining cushion loft and shape.

The following Gus* Modern products use PET fill:

Aubrey Sofa **NEW**
Flipside Sofabed
Garrison Sofa
Logan Bi-Sectional

Logan Sofa
Margot Sofa
Parkdale Bi-Sectional **NEW**
Parkdale Sofa **NEW**
