

Laser Light Low Voltage Adapter

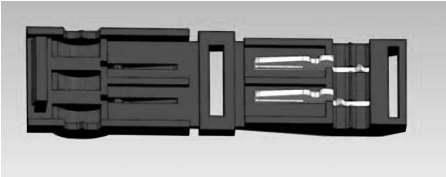

Only use with low voltage outdoor landscape lighting systems with power supplies that have a maximum of 12V, 300W per circuit output rating. Consult owner's manual for details and ratings.

⚠ WARNING: RISK OF FIRE OR ELECTRICAL SHOCK

Do not connect the adapter directly to the power supply. Use only on the 18 gauge wire attached to the low voltage landscape lighting. Single use only. Do not attempt to remove and reinstall.

Kit Includes:

Adapter clamp

Adapter connector

Installation:

1. Open clamp by prying open with your thumb and index finger while pinching the opposite end. See fig. 1. With the power turned off, place your home's 18 gauge outdoor landscape lighting cable into the groove. See fig. 2.

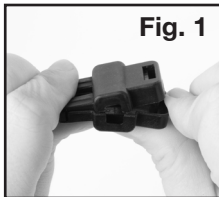

Fig. 1

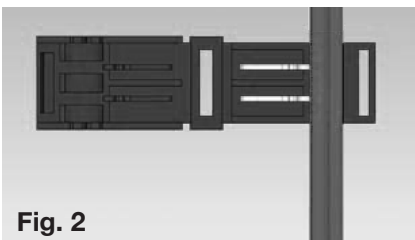

Fig. 2

2. Close clamp over cord. See fig. 3. Pinch clamp together tightly so that the clamp can penetrate the cord insulation to make a connection. See fig. 4.

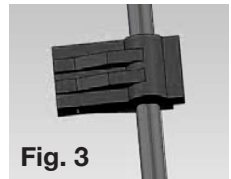

Fig. 3

Fig. 4

3. Plug connector into clamp. Either connector plug can go into either clamp outlet. See fig. 5. Screw the laser light's 2-prong adapter into the connector. See fig. 6 and laser light unit instructions for laser light parts diagram. Laser light will now be powered through your home's landscape lighting power source.

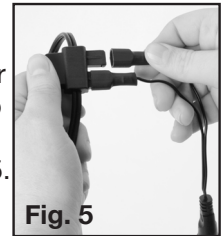

Fig. 5

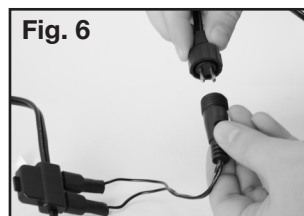

Fig. 6

If your laser light does not light....

- Make sure the 2-prong adapter has been properly screwed into the connector.
- Make sure the clamp is closed tightly. See step 2.
- Check that your landscape lighting system's power is on.

• ATTENTION •

If you have product questions, or need assistance in using your Viatek Product, or need replacement parts, please do not return to your retailer. Contact VIATEK at 423.402.9010 or toll free at 1-888-7VIATEK.

For refunds on items not purchased from Viatek directly, please contact your retailer.
