

Laser Light Tripod Instructions for Use

1. Unscrew the wingnut from the mounting screw.
2. Screw the laser light's pivot mount (see laser light instructions) onto mounting screw (see fig. 1).
3. Screw wingnut onto mounting screw until tight (see fig. 2).
4. Adjust the tripod and the laser light's pivot mount until a desired angle and sturdy position are achieved.

Mounting Plate

For use with the laser light, leave the mounting plate in place. However, when using the tripod for other applications you may need to remove the mounting plate. Follow these instructions:

1. Unscrew the locking screw, press the release button, and remove the mounting plate.
2. Screw the mounting screw into the device intended to be mounted (see device's user manual to see if it's compatible with the tripod). You may need to use a screwdriver to tighten the mounting screw until snug.
3. Slide the mounting plate back into the slot on the tripod. The plate will snap into place.
4. Tighten the locking screw to lock the release button.
