Welcome to Equal Adventure

Equal Adventure Developments Ltd has been making the outdoors more accessible and safer with disabled and non-disabled people through the provision of training and equipment since 1995.

Our Standards - EAD Ltd is an ISO 9001 2015 accredited business for all of its operations and designs, manufactures and delivers training to the relevant PPE and Safety Standards.

We are a small family and community based business located in the Highlands of Scotland who create and sell enabling adventure sports equipment and deliver inclusive-active, practical, evidence-based inclusion training. Working alongside and supporting Equal Adventure Charity.

Our values are important to us and provide a strong basis in what we do and how we will work with you:

- We create supported, reliable, innovative products. This brochure helps to introduce you to a many of them
- Our interdisciplinary staff team are valued, well trained and skilled
- Environment is always at the forefront of what we do. We value our customers while not costing the planet
- As a design innovation business we are always looking forward for the next opportunity.
- Join us on our journey to inclusion.

In this brochure do read on....

Within this brochure you will find “EAD Equipment Bundles”, which are selected and put together to provide the main elements of equipment we believe would be useful for different groups of activities. If you are fundraising for equipment and training, bundles are a great place to start and consider as they provide you with a fantastic selection of pieces of equipment and storage, ideal to start your adventure into an area of activity or sport. All the equipment is designed to support inclusive activities within the chosen activity or sport and is to assist individuals and groups participate and develop their inclusive performance in a safe and effective way.

Every piece of equipment has been designed and made with passion.

Passion for the outdoors and passion for everyone to experience all the outdoors has to offer in a safe and fun way.

We hope you love what we do as much as we do.

Equal Adventure Developments Ltd operates to ISO 9001:2015 for all of its Research, Design, Manufacturing, Training and Consultancy.

Equal Adventure Developments Ltd delivers a range of inclusion training modules which are accredited by the Institute For Outdoor Learning.

Equipment categories overview

A positive, active approach is essential to providing and participating in inclusive outdoor activities.

Equal Adventure uses icons and colours to categorise information across its range of equipment and training. These categories help unravel often complex issues relating to communication, functional abilities, personal needs and mobility. They provide a structure that helps individuals, activity providers and technical advisers to select appropriate equipment and use it safely during quality inclusive activity sessions.

Communication and Sensory Learning Aids

A category of equipment providing a range of solutions to support visual, auditory, kinaesthetic and tactile communication for both the coach and the participant.

Function: Pads and Protection

A sub-category of Function equipment, providing a range of solutions to pad and protect delicate or sensitive areas, such as stump ends or parts of the body with limited or no feeling, control and/or strength.

Function: Trunk and Postural Support

A sub-category of Function equipment, providing a range of solutions to support posture, sitting balance and comfort during performance.

Function: Hand and Arm Function

A sub-category of Function equipment, providing a range of solutions for gripping, supporting, manipulating and controlling sports equipment such as shafts and paddles.

Personal Experience

A category of equipment providing a range of solutions that support dignity whilst undertaking personal needs, support individuals to remain in control of their decision making, and support individuals to maximise on their capacity by removing distractions.

Movement and Mobility: Independent Movement

A sub-category of equipment, providing a range of solutions to promote independent movement. Products support journeys in and around, or to and from an activity site, without the need for anything other than verbal or light tactile support.

Movement and Mobility: Assisted Movement

A sub-category of equipment, providing a range of solutions supporting the safe and comfortable movement, journeys and positioning of people who require assistance to move in and around, or to and from an activity site.

Movement and Mobility: Mechanical Movement

A sub-category of equipment, providing a range of mechanical solutions supporting the safe and comfortable movement, journeys and positioning of people who require assistance to move in and around, or to and from an activity site.

Activity and Safety Equipment

A category of equipment providing a range of products that provide versatile solutions to accommodate inclusive activities. These products are specific to an activity or group.

Storage and Information

A range of equipment and information resources which allow you to manage your equipment effectively, whilst at the same time helping you to access the right equipment quickly. The storage and information system reduces wear and tear on equipment, and helps to reduce equipment loss.

Variants overview

Some products have variants to ensure the best fit or match to a functional need. Variants range in type:

Colour

Where applicable an indication of the colour of the product is provided. Each colour definition aims to provide guidance on the predominant colour. The use of colour and visual contrast of materials (along with consideration to texture and tactile features) is intended to support independent fitting. It also aims to provide opportunities to improve visual, auditory and tactile SENSEable communications.

One Colour

The product is likely to be predominantly one colour with few other coloured parts of significance.

Two Colours

The product is likely have few parts that are coloured differently.

Three Colours

The product is likely to have some parts that have been coloured to contrast with others to support SENSEable communications.

Four Colours

The product is likely to be intentionally multicoloured to enable significant SENSEable combination to support use.

Size

Sizes are provided as a guide and are provided either as a suggested age range, a size range or growth development range.

Age range

The side of the body is indicated for a product that may be appropriate for an asymmetric body shape or a performer with a dominant side.

Size range

Products combinations of single, paired or either hand/s or feet support the differences in availability of limbs their strength and control.

Growth range

Products combinations of single, paired or either hand/s or feet support the differences in availability of limbs their strength and control.

Sides, hands and feet

Body shape considers the symmetry of the performer a product may be suitable for a particular side of the body and or appropriate for a particular hand or foot, pair of hands or feet or an individual hand or foot.

Sides

The side of the body is indicated for a product that may be appropriate for an asymmetric body shape or a performer with a dominant side.

Hands and Feet

Products combinations of single, paired or either hand/s or feet support the differences in availability of limbs their strength and control.

Professional Judgement & System Awareness

Bundles are created considering the principles of STACKING:

Each Bundle is not a single solution to the activity being undertaken. Professional Judgement and Decision Making is essential to create considered, safe and fun inclusive activities and opportunities. Use of equipment from a bundle should be done using appropriate planning based on current situational awareness and should balance the requirements of the individual, the group and co-workers in conjunction with the current organisational operating procedures and work instructions.

Each product should be considered part of a system and should aim to support the provision of quality, safe experiences that build on available capacity and aim to reduce interferences which hinder performance. Equal Adventure encourages a positive-asset based approach where individuals are encouraged and supported to do what they can with what they have. With appropriate judgement and decision selecting and assembling combinations of products from bundles enables **ACTIVITIES** to be undertaken in a particular **ENVIRONMENT** with the aim of supporting **PERFORMANCE**, measured with metric from smiles to podium places, in a way which is considerate to the **PERSONAL EXPERIENCE** of the performer and their dignity, comfort, control and capacity.¹

¹All icons used on this page and any text in bold relate to items within Equal Adventures training modules. Each item breaks up individual aspects of what can be considered sticky information and unwraps it to provide a clarity of understanding to support positive approaches to the provision of inclusive outdoor activity opportunities and active lifestyles.

Product Safety Warnings

Each product has a safety warning assigned to it. Each warning indicates the a consequence of misuse which range from a reduction in personal control by the individual through to serious consequences such as death or irreversible damage to health. Always consider how the product is to be used to benefit inclusive practice and support this with appropriate consideration to what may happen should the situation or the individual change.

Misuse may reduce control and communication.

Misuse may cause discomfort or loss of dignity.

Misuse may involve risks that may cause very serious consequences such as death or irreversible damage to health.

Training

Equal Adventure provides a series of Institute for Outdoor Learning (IOL) Accredited training modules directly linked to supporting organisations, outdoor practitioners and coaches to develop their own inclusive practictices. There are a range of modules which explore topics surrounding a positive asset based approach, communication, function, movement and mobility, personal experience, the activity environment, activities, performance, posture, professional judgement and decision making and many more.

Training and equipment have been mapped together to provide clarity on how the use of products and the activity systems they are part of can be best used to create meaningful, safe, enjoyable inclusive activity sessions, journeys and expeditions.

For information on Equal Adventure training modules and courses please visit:
training.equaladventure.org

Find us on the web at www.equaladventure.co.uk

We invite you to explore our full range of products, training and services all dedicated to making outdoor adventure, active lifestyles and fieldwork accessible to all:

Training

We have a range of IOL Accredited Inclusion Training Modules that support practitioners to develop their inclusive practice.

Equipment

Choose from over three hundred products that are subdivided into categories to help you meet a particular need or functional requirement.

Bundles

Use the bundles to help you with your fundraising, all our bundles are designed to give you a starting point for a given sport or activity. All bundles include storage and information to ensure that you can make the most of your resources in a sustainable manner and share them with other organisations, families or individuals.

Consultancy & Support

If you have a participant development project that requires advice support, training or inclusive design engineering or bespoke manufacture please contact us.

Advice Guidance and Ordering

We know our products, so why not give us a call or email and let us know how we can help.

You can contact us to discuss your personal and individual needs and preferences and we can help and advise on the best products to consider.

Our team has over thirty years of experience and we love to share this to help our customers and guide you through the complexities of choosing equipment and training to support your needs and your budget.

OUTDOOR PRODUCT BUNDLES

Winter 2023

Archery Bundle

Sku code: BUN-ARCH-1
Version no.: 1

Price: £5,774.89 (ex VAT)

Description

The Archery Bundle is a selection of equipment for centre or organisation use which enables inclusive archery at the beginner to intermediate level to be engaged in safely and effectively.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Archery Bundle has been compiled to support centres with archery facilities and organisations keen to maximise their level of inclusion. The Archery Bundle supports archery from a seated, perched or stood position. It allows the archer to hold and draw a bow effectively and comfortably.

The bundle enables:

- Individuals who require assistance with hand or arm function to grip or hold bows
- Individuals who require assistance with hand or arm function to release an arrow
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Archery Bundle provides a selection of equipment to support the use of arm and hand function in archery. The Archery Bundle is for indoor and field archery use, where the appropriate elements of the activity environment are accessible to the participants. Where the activity environment is not accessible, Equal Adventure's Independent or Assisted Movement Bundles may be required. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting.

Assisted Movement 2.0 Bundle

Sku code: BUN-ASM-2
Version no.: 2

Price: £3,288.50 (ex VAT)

Description

The Assisted Movement Bundle is a selection of equipment for centre or organisation use which enables the assisted movement of an individual safely and effectively, to allow them to complete a range of inclusive activities.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Assisted Movement Bundle has been compiled to support centres and organisations whose aim is to maximise their level of inclusion. The Assisted Movement Bundle is suitable for indoor and outdoor use, between dry land and water based activities, even when experiencing rough terrain or adverse weather conditions.

The bundle enables:

- Individuals to be lifted either manually or mechanically in comfort and with dignity
- Individuals to transfer easily between surfaces and equipment of different heights
- Individuals to move between dry land and water in a safe and efficient manner
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Assisted Movement Bundle is suitable for those who require assistance with transfer between one position and another, including surfaces of various heights, and sporting equipment. It supports sideways and vertical transfer with the use of the transfer sling included. This bundle is designed to allow the participant and any supporters to maintain dignity and control during assisted movement. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

Climbing and High Ropes 3.0 Bundle

Sku code: BUN-CLHR2-4
Version no.: 4

Price: £15,829.73 (ex VAT)

Description

The Climbing and High Ropes Bundle 3.0 is a selection of equipment for centre or organisation use, which enables inclusive climbing activities at the beginner to intermediate level to be engaged in safely and effectively.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Climbing and High Ropes Bundle 3.0 has been compiled to support centres with climbing facilities and organisations keen to maximise their level of inclusion. It provides a selection of equipment to support a wide range of mobility and functional abilities, from ambulant and active participants, to wheelchair users and arms only performers. This is achieved by the provision of appropriate postural supports, pads and protection to support and protect the climber. A range of activity and safety equipment is included for safe and meaningful inclusion during differentiated activities within the climbing setting. Equipment selection from this bundle enables individuals of different shapes and sizes, with differing mobility, functional and personal needs, to be accommodated. It enables various activity opportunities to be undertaken, such as the climbing of standard climbing walls, adapted climbing walls and vertical ropes.

The bundle enables:

- Individuals who require assistance with hand and arm function to grip or hold standard climbing equipment
- Individuals with the use of only one arm to use single arm climbing devices
- Individuals who require assistance with sitting balance, such as those with spinal cord injuries or unbalanced body shapes, to achieve this by using postural supports and pads to maintain an active climbing position
- Individuals with complex body shapes to maintain comfort and dignity whilst enjoying a more experiential or sensory form of participation
- Communication to be supported between individuals and instructors
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Climbing and High Ropes Bundle 3.0 is for indoor and outdoor climbing use, where the appropriate elements of the activity environment are accessible to the participants. Where the activity environment is not accessible, Equal Adventure's Independent or Assisted Movement Bundles may be required. The Climbing Bundle 3.0 supports top or bottom roping activities and free hanging rope based activities, where the participant may ascend or descend. Where the capacity of the participants allows, multi-pitch climbing activities are also supported. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

Bundle contents

Field Living 2.0 Bundle

Sku code: BUN-FIELD-2
Version no.: 2

Price: £3,898.00 (ex VAT)

Description

The Field Living Bundle is a selection of equipment for centre or organisation use, which enables inclusive adventure activities at the beginner to intermediate level to be engaged in safely and effectively.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Field Living Bundle has been compiled to support centres with climbing facilities and organisations whose aim is to maximise their level of inclusion. Equipment selection from this bundle enables individuals of different shapes and sizes, with differing mobility, functional and personal needs, to be accommodated.

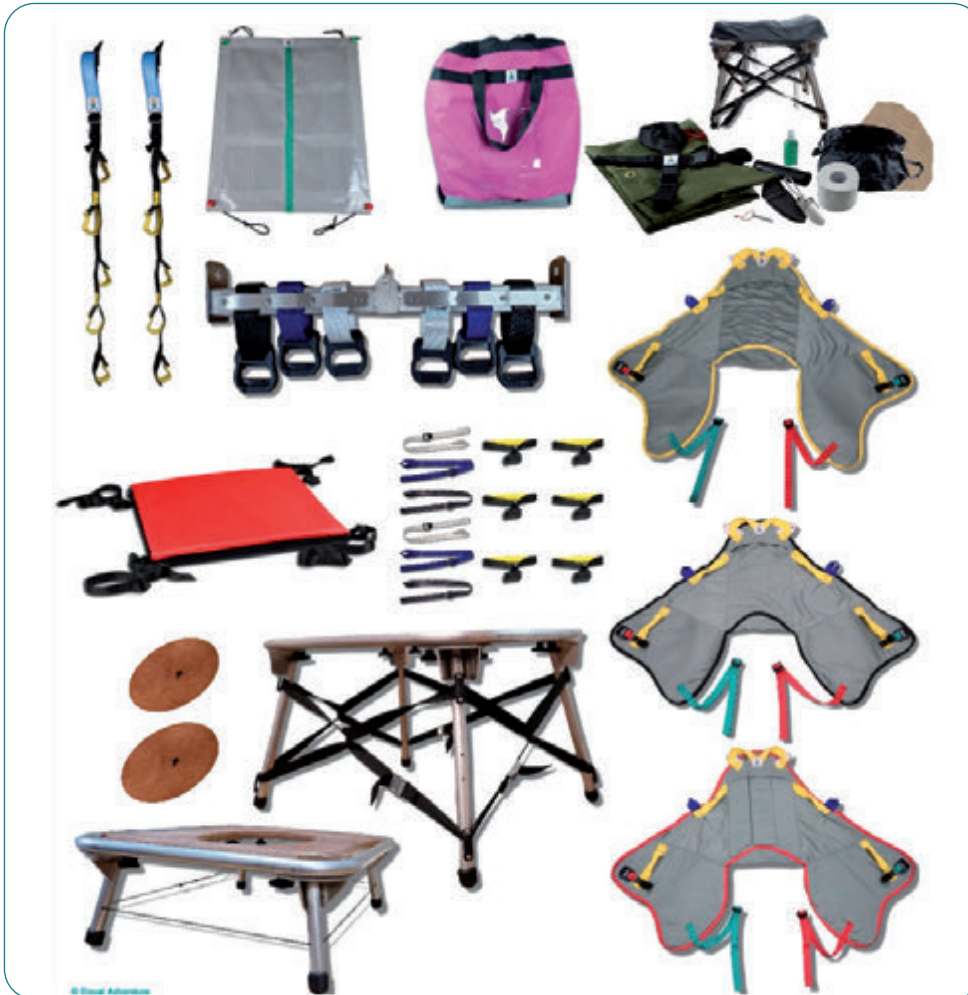

The bundle enables:

- Participants to experience the outdoors safely and comfortably
- Independent and assisted movement between a range of heights and across rough terrain
- Participants to maintain personal hygiene and daily routines as independently as appropriately
- Assistants to assist with movement and daily routines comfortably and with dignity
- Communication to be supported between individuals and instructors
- Equipment to be stored in a way that is convenient and accessible. With careful planning this resource can be used to support a greater number of individuals with various impairments in an inclusive setting.

Suitable for

The Field Living Bundle is suitable for those who require self directed assistance with transfer between one position and another, including surfaces of various heights, and sporting equipment. The Field Living Bundle enables participants to engage in a range of personal care activities and movement patterns to enable safe and meaningful inclusion whether indoors or outdoors, even when experiencing rough terrain or adverse weather conditions.

Independent Movement 2.0 Bundle

Sku code: BUN-INM-2
Version no.: 2

Price: £2,730.00 (ex VAT)

Description

The Independent Movement Bundle is a selection of equipment for centre or organisation use which enables an individual to safely and effectively take personal control of their mobility, to allow them to complete a range of inclusive activities.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Independent Movement Bundle has been compiled to support centres and organisations whose aim is to maximise their level of inclusion. The Independent Movement Bundle is suitable for indoor and outdoor use, between dry land and water based activities, even when experiencing rough terrain or adverse weather conditions.

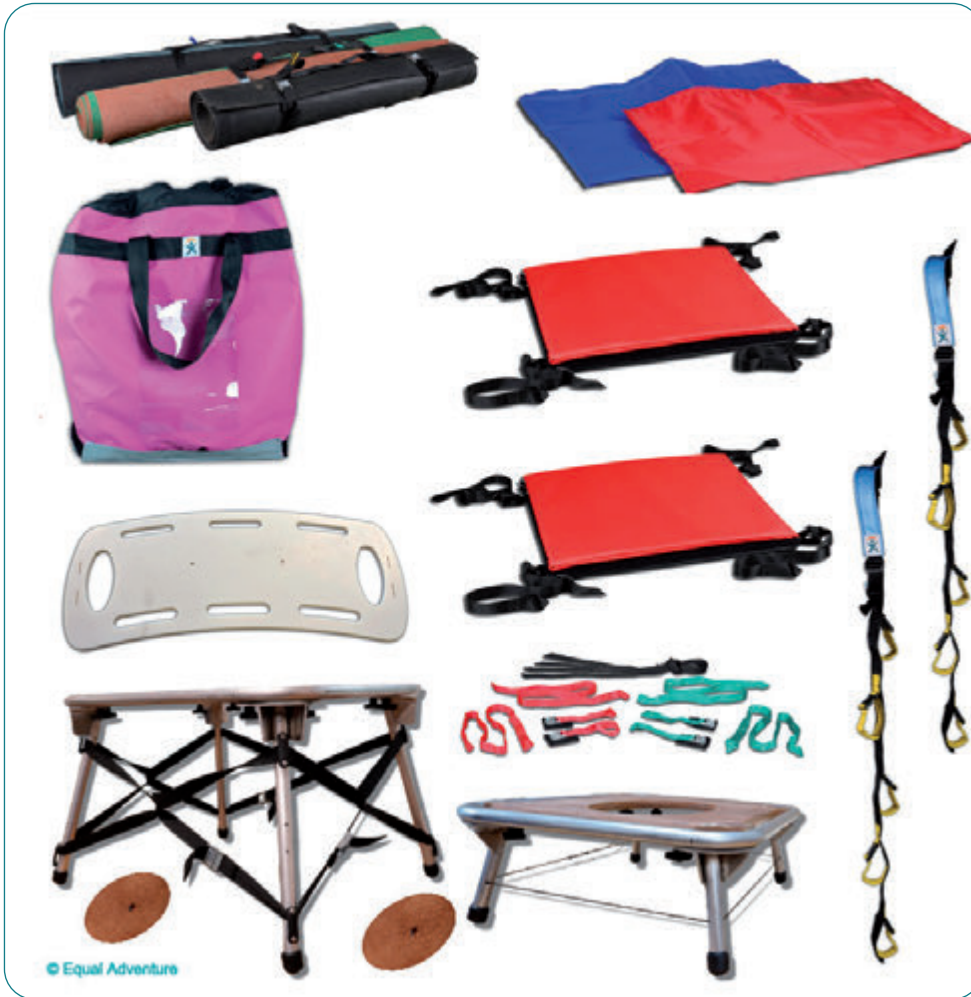

The bundle enables:

- Individuals to move across long and short distances on dry land in a safe and efficient manner
- Individuals to move between dry land and water in a safe and efficient manner
- Individuals to transfer easily between surfaces and equipment of different heights
- Sporting equipment, such as canoes, to be secured and moved in and out of the water
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Independent Movement Bundle is suitable for those who require self directed assistance with transfer between one position and another, including surfaces of various heights, and sporting equipment. The Independent Movement Bundle enables participants to engage in a range of movement patterns to enable safe and meaningful inclusion. It facilitates solo sideways and vertical transfers, or transfers which are supported by a light touch or verbal support. The Independent Movement Bundle is suitable for indoor and outdoor use, even when experiencing rough terrain or adverse weather conditions. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

Sailing 2.0 Bundle

Sku code: BUN-SAIL-2
Version no.: 2

Price: £10,818.13 (ex VAT)

Description

The Sailing Bundle is a selection of equipment for centre or organisation use that enables inclusive water- based activities at the beginner to intermediate level to be engaged in safely and effectively.

Bundles are collections of products from various categories of Equal Adventures ranges Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Sailing Bundle has been compiled to support sailing centres and organisations whose aim is to maximise their level of inclusion. The Sailing Bundle provides a selection of equipment to support a wide range of mobility and functional abilities, from ambulant and active participants, to those participating in sailing for the more experiential or sensory benefits. This is achieved by the provision of appropriate postural supports, pads and protection to support and protect the participant. A range of activity and safety equipment is included to allow for safe and meaningful inclusion in differentiated activities within the sailing setting. Equipment selection from this bundle enables individuals with differing mobility, functional and personal needs to be accommodated and activity opportunities to be undertaken, such as introductions to inshore sailing.

The bundle enables:

- Individuals who require assistance with hand or arm function to grip or hold sailing equipment
- Posture to be maintained by individuals who require assistance with sitting balance, such as those with spinal cord injuries or unbalanced body shapes, by using postural supports and pads to maintain an active paddling position
- Individuals with complex body shapes to maintain comfort and dignity whilst enjoying a more experiential or sensory form of participation
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Sailing Bundle is for lake and inshore use, where the appropriate elements of the activity environment are accessible to the participants. Where the activity environment is not accessible, Equal Adventure's Independent or Assisted Movement Bundles may be required. NB Access and egress should be carefully monitored by appropriate supervision when utilising this bundle. The Sailing Bundle supports dinghy sailing in a range of paralympic classes, and coastal sailing in a range of yachts. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

Sensory Bundle

Sku code: BUN-SEN-1
Version no.: 1

Price: £3,471.00 (ex VAT)

Description

The Sensory Bundle is a selection of equipment for centre or organisation use which enables inclusive communication and learning.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Sensory Bundle has been compiled to support centres and organisations whose aim is to maximise their level of inclusion through a focus on communication between participants and instructors, to create a sense-able and engaging indoor or outdoor environment. The Sensory Bundle allows information, especially relating to spatial awareness, to be communicated more accurately. It reduces the cognitive load on participants by controlling the transfer of accessible information and meeting their visual, kinaesthetic and/or tactile communication preferences.

The bundle enables:

- Visual, kinaesthetic and/or tactile communication to be supported and/or promoted between individuals
- A range of tactile targets to be set out to engage participants into activities
- Participants to set their own targets in a range of environments
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Sensory Bundle supports or supplements communication between participants, and participants and coaches/instructors, in a range of activities. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

Bundle contents

2 x Stuck-on-Coaching

Storage Bundle

Sku code: BUN-STO-1
Version no.: 1

Price: £3,073.00 (ex VAT)

Description

The Storage Bundle is a selection of storage and information equipment for centre or organisation use designed to store Equal Adventure equipment and other outdoor and active lifestyle equipment.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Storage Bundle has been compiled to support centres and organisations to maximise their level of inclusion for participants and instructors. The Storage Bundle stores the equipment in an accessible fashion by suspending each item with a descriptive label. This means that the equipment can be selected quickly and is protected from loss. The products can be set up at varying heights to allow access from both stood and seated positions. The products are easy to remove and return and so can be used by people who require assistance with hand or arm function. The display system is attractive and easy to manoeuvre, so can also be used to highlight the inclusive activities provided by the centre or organisation.

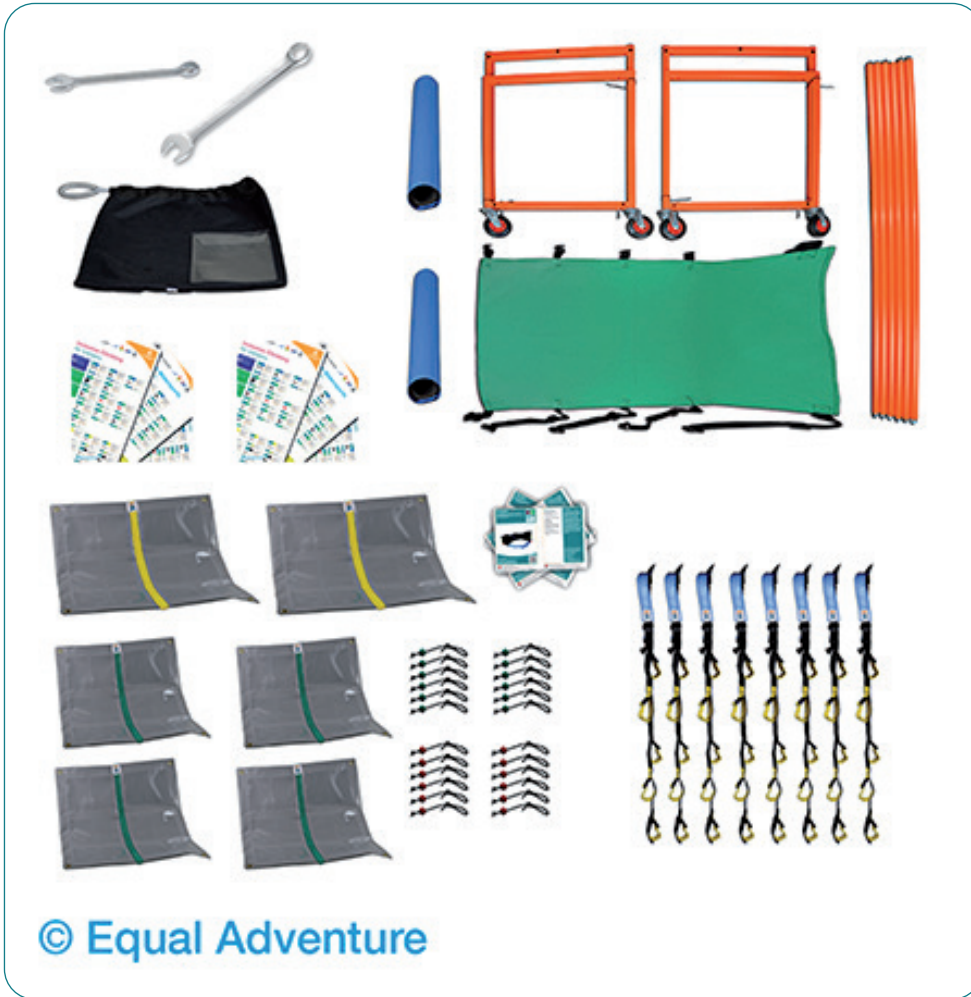

The bundle enables:

- A range of equipment to be stored in a way that is accessible, physically and mentally
- Equipment to last for longer by reducing wear and tear, and preventing loss
- 'Sense-able' approach for visual, kinaesthetic and/or tactile communication to be supported and/or promoted between individuals
- Individuals to identify their mobility and functional ability and how they might best use the products.

Suitable for

The Storage Bundle is designed to store Equal Adventure equipment in a convenient and accessible way.

Watersports and Paddlesports 4.0 Bundle

Sku code: BUN-WSPP-4
Version no.: 4

Price: £12,165.53 (ex VAT)

Description

The Watersports and Paddlesports Bundle is a selection of equipment for centre or organisation use, which enables inclusive water based activities at the beginner to intermediate level to be engaged in safely and effectively.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Watersports and Paddlesports Bundle has been compiled to support centres with water facilities and organisations whose aim is to maximise their level of inclusion. The Watersports and Paddlesports Bundle provides a selection of equipment to support a wide range of mobility and functional abilities, from ambulant and active participants, to those participating in watersports for the more experiential or sensory benefits. This is achieved by the provision of appropriate postural supports, pads and protection to support and protect the paddler.

A range of activity and safety equipment is included. This allows the creation of safe and meaningful differentiated activities within the inclusive watersports setting. Equipment selection from this bundle enables individuals with differing mobility, functional and personal needs to be accommodated, and a variety of activity opportunities to be undertaken, such as open canoeing or kayaking. The bundle enables:

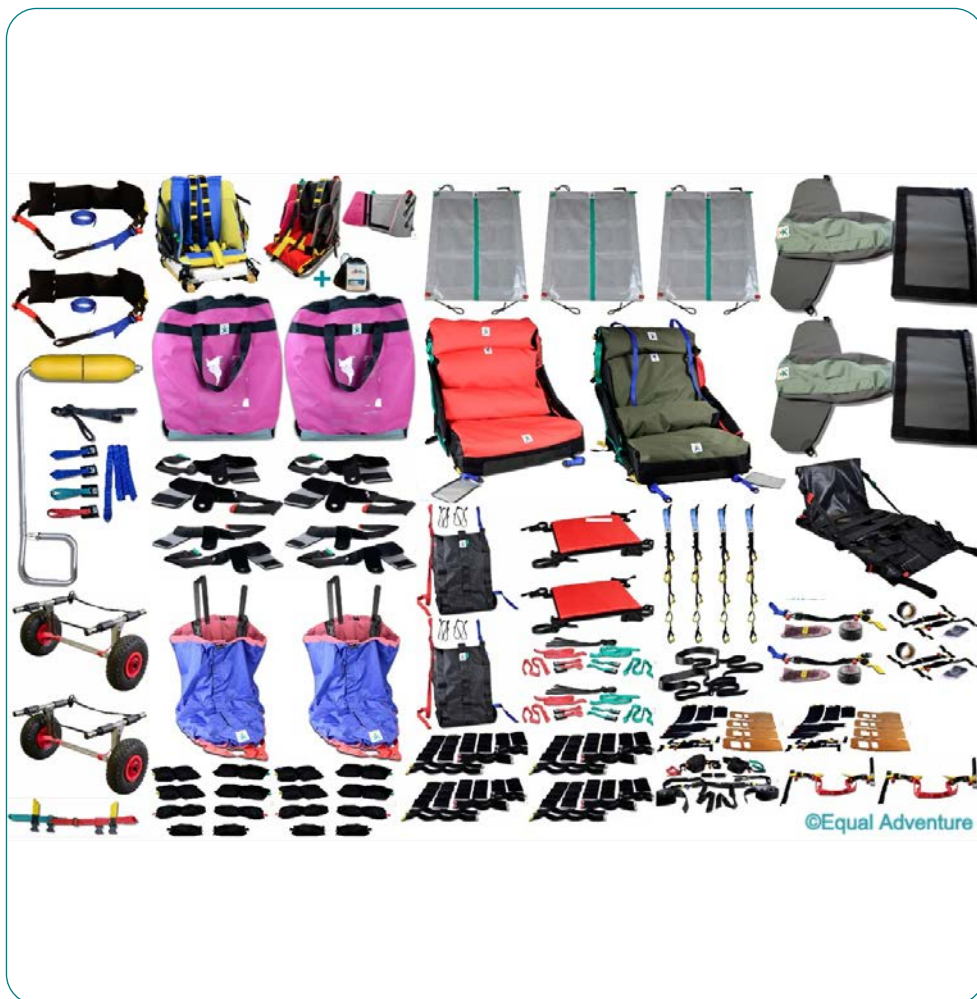

- Individuals who require assistance with hand or arm function to grip or hold paddles
- Individuals with the use of only one arm to use single arm paddling devices
- Individuals who require assistance with sitting balance, such as those with spinal cord injuries or unbalanced body shapes, to achieve this by using postural supports and pads to maintain an active paddling position
- Individuals with complex body shapes to maintain comfort and dignity whilst enjoying a more experiential or sensory form of participation
- Communication to be supported between individuals and instructors
- Equipment to be stored in a way that is convenient and accessible.

Suitable for

The Watersports and Paddlesports Bundle is for watersports in sheltered to moderate water and swimming pool use, where the appropriate elements of the activity environment are accessible to the participants. Where the activity environment is not accessible, Equal Adventure's Independent or Assisted Movement Bundles may be required.

N.B. Access and egress should be carefully monitored by appropriate supervision when utilising this bundle. The Watersports and Paddlesports Bundle supports active participation in canoeing, open canoeing, kayaking (sit on top and touring sea kayak), paddleboarding, inflatable rafting (and duckies), sailing (including long boats and some Paralympic classes) and powerboating. Each bundle is designed around a group size of 12, and is sufficient for those working in an inclusive setting with participants who have various impairments.

ALL TERRAIN BUNDLES

Winter 2023

Boma Joystick Individual Bundle (Basic) 2.0 Bundle

Sku code: BUN-BJI-2-B
Version no.: 2.0

Price: £18,386.24 (ex VAT)

Description

The Boma 7.5 Joystick Control All Terrain wheelchair is the ultimate off-road chair for adventurous individuals with higher level mobility impairments. Everything you need to get back in the great outdoors.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

The Boma 7.5 Joystick Control All Terrain wheelchair features the same chassis drive system as the Boma 7.5 Handlebar control chair. Steering and drive are controlled electronically through an intuitive power chair style joystick which can be mounted on either the left or right armrest. Armrests are quick release with multiple adjustment in height and angle to ensure a comfortable driving position. Increased postural support is provided by a 4 point harness and leg/knee straps. The Boma 7.5 Joystick features the Equal Adventure modular electronic system allowing simplified support and maintenance of the chair. The system also allows plug and play of other electronic accessories such as road and trail lighting.

Suitable for

This is for individuals who want to own an entry level Boma and are able to control it using their fingers.

Bundle contents

- 1 x Boma 7.5 Standard Seat
- 1 x Boma 7.5 J2 Seat Cushion
- 2 x Adjustable Gutter Arm Rest
- 1 x Arm Rest To Joystick Fixing
- 1 x Zebra Adjustable Foot Rest and Leg Support System

- 1 x Boma Rolling Chassis
- 1 x Boma Joystick 7.5 Electrical System
- 1 x Boma 7.5 Boma Green Frame Colour
- 1 x Joystick Basic
- 1 x Boma Mounting Actuator
- 1 x Joystick Steering

- 1 x Sporrán - Boma On the Road Tool Kit and Pouch

Boma Handlebar Individual (Left) Bundle (Deluxe) 2.0 Bundle

© Equal Adventure

Sku code: BUN-BHIL-2-D
Version no.: 2.0

Price: £15,800.00 (ex VAT)

Description

Boma 7.5 Handlebar is an electrically powered all terrain mobility solution designed to accommodate riders with a range of physical impairments. Boma 7.5 Handlebar is suitable for riders who have some use of their upper body and arms. A range of accessories are available for riders with gentle steering and additional postural requirements.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

Boma Handlebar and Boma Joystick feature the same chassis, drive, basic seating and accessories/options. Both are designed to be easily accessible, easy to use, extremely capable and to provide a riding experience unlike anything else. Boma's steel tube chassis, all-round suspension, powerful drive axle and low centre of gravity make it extremely capable and stable off-road. Designed for easy access for wheelchair/seated position as well as from standing position; the front wheel of the Boma can be swung out of the way, allowing extra space to draw your wheelchair in the transfer. Standard seating is a heavily padded and adjustable nylon upholstery backrest with lap safety belt which must be in place for the Boma to operate. The handlebar steering system is extremely intuitive, as is the twist grip motorbike style throttle. While the steering is light and responsive, it also gives you a sense of being involved in the ride; this isn't any normal powered wheelchair. The throttle can be fitted on the left or right side, or on both sides (interchangeable by switch) which can be useful for riders who suffer with fatigue in their grip. Speed ranges switchable between 4 mph and 8 mph in accordance with footpath regulation.

Suitable for

Individuals and organisations who want to access rough terrain, paths, trails, countryside and beaches, who have a mobility impairment.

Boma Handlebar is suitable for both adults and children with a slightly limited upper body, hand and arm function. The twist grip throttle system can be adapted for those with limited hand function and the Boma handlebar steering is light and responsive, requiring very little strength in the arms.

Bundle contents

- 1 x Boma 7.5 Standard Seat
- 1 x Boma 7.5 J2 Seat Cushion
- 1 x Zebra Adjustable Foot Rest and Leg Support System
- 1 x Side Scuff Protector

- 1 x Boma Rolling Chassis
- 1 x Boma 7.5 Boma Green Frame Colour
- 1 x Boma 7.5 S Drive Control System

- 1 x Boma 7.5 Left-Hand Twist Grip Throttle

- 1 x Boma Day Bag and Stick Carrier
- 1 x Boma Class III 3.0 Handlebar

Boma Joystick Centre or Organisation Bundle 2.0 Bundle

© Equal Adventure

Sku code: BUN-BJCO-2
Version no.: 2.0

Price: £18,777.24 (ex VAT)

Description

The Boma 7.5 Joystick for Organisations is specified to meet the needs of outdoor centres and hire centres where the chair must quickly adapt for the requirements of multiple users. Suitable for all individuals.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

Boma 7.5 Joystick for Organisations is the most adaptable and accessible All Terrain wheelchair available for outdoor centres and hire centres. The handlebar control system is suitable for individuals with postural balance and good arm function. Control of the chair is through an intuitive power chair joystick which can be mounted on either right of the seat. The Boma 7.5 Joystick includes a quick release and position adjustable armrests which provide better positioning and support for the rider. The chair also features a 4 point harness and leg/knee positioning straps for added security and confidence. The Boma 7.5 for Organisations features the Zebra, fully adjustable foot rest and leg support system allowing the Boma to quickly adapt to different age/size riders.

Suitable for

This is a complete Boma 7.75 suitable for outdoor centres or organisations who want to cater for the needs of potential Boma riders who have adequate arm function to use the joystick Boma either left or right hand controlling as part of the ride.

Bundle contents

- 1 x Boma 7.5 Standard Seat

Version no.: 2.0

Price: £15,667.75 (ex VAT)

Description

The Boma 7.5 Handlebar DT for Organisations is specified to meet the needs of outdoor centres and hire centres where the chair must quickly adapt for the requirements of multiple users. Suitable for individuals with good upper body balance and good arm function.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

Boma 7.5 Handlebar DT for Organisations is the most adaptable and accessible All Terrain wheelchair available for outdoor centres and hire centres. The handlebar control system is suitable for individuals with postural balance and good arm function. Acceleration and braking is controlled by a twist grip throttle. Some individuals may be stronger or more confident with their left-hand or right hand. To accommodate this the Boma 7.5 Handlebar DT is fitted with dual throttles; one on the left-hand, one on the right-hand which you can switch between depending on the rider. The Boma 7.5 for Organisations features the Zebra, fully adjustable foot rest and leg support system allowing the Boma to quickly adapt to different age/size riders.

Suitable for

This is a complete Boma 7.75 suitable for outdoor centres or organisations who want to cater for the needs of potential Boma riders who have adequate arm function to use the handlebar Boma either left or right hand controlling as part of the ride.

Sku code: BUN-BHIL-2-B
Version no.: 2.0

Price: £14,718.00 (ex VAT)

Description

Boma 7.5 Handlebar is an electrically powered all terrain mobility solution designed to accommodate riders with a range of physical impairments. Boma 7.5 Handlebar is suitable for riders who have some use of their upper body and arms. A range of accessories are available for riders with gentle steering and additional postural requirements.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

Boma Handlebar and Boma Joystick feature the same chassis, drive, basic seating and accessories/options. Both are designed to be easily accessible, easy to use, extremely capable and to provide a riding experience unlike anything else. Boma's steel tube chassis, all-round suspension, powerful drive axle and low centre of gravity make it extremely capable and stable off-road. Designed for easy access for wheelchair/seated position as well as from standing position; the front wheel of the Boma can be swung out of the way, allowing extra space to draw your wheelchair in the transfer. Standard seating is a heavily padded and adjustable nylon upholstery backrest with lap safety belt which must be in place for the Boma to operate. The handlebar steering system is extremely intuitive, as is the twist grip motorbike style throttle. While the steering is light and responsive, it also gives you a sense of being involved in the ride; this isn't any normal powered wheelchair. The throttle can be fitted on the left or right side, or on both sides (interchangeable by switch) which can be useful for riders who suffer with fatigue in their grip. Speed ranges switchable between 4 mph and 8 mph in accordance with footpath regulation.

Suitable for

Individuals and organisations who want to access rough terrain, paths, trails, countryside and beaches who have a mobility impairment.

Boma Handlebar is suitable for both adults and children with a slightly limited upper body, hand and arm function. The twist grip throttle system can be adapted for those with limited hand function and the Boma handlebar steering is light and responsive, requiring very little strength in the arms.

Bundle contents

1 x Boma 7.5 Standard Seat

1 x Boma 7.5 J2 Seat Cushion

1 x Zebra Adjustable Foot Rest and Leg Support System

1 x Boma Rolling Chassis

1 x Boma 7.5 Boma Green Frame Colour

Boma Attendant Control Bundle

Sku code: P-BASC-7.5
Version no.: 7.5

Price: £778.50 (ex VAT)

Description

This allows an assistant to take full control of the Boma when needed.

Bundles are collections of products from various categories of Equal Adventures ranges. Please apply professional judgement and decision making to create safe, effective and comfortable inclusive activity systems using combinations of products appropriate to the current situational need. Please consider the Activity, Environment, Performance and Personal Experience.

Details

Boma 7.5 Attendant Control consists of a second handlebar unit mounted behind or to the side of the Boma seat. The attendant can switch control from the rider handlebar to the attendant unit and control all aspects of the chair. The system allows those without the stamina or spatial awareness to operate the Boma independently to still experience the thrill of outdoor adventure. The attendant can walk next to the Boma chair, increasing the social aspect of being outdoors together.

Suitable for

Organisations or individuals owning Boma 7+ who want to assist the Boma in all aspects from behind using a attendant steering control system.

Bundle contents

1 x Boma Elephant Reins

1 x Boma Shark Kill Switch

1 x Boma Monkey Bar Attendant (Commonly Used With Elephant Reins)

Boma 7 Joystick Upgrade Bundle Self Fit Bundle

Sku code: BUN-BJU-1
