

MagStor

LTO TAPE SOLUTIONS

MAGSTOR & LTO

MagStor uses **magnetic tape** to store large amounts of data safely for **30 years**. MagStor LTO Tape Drives connect to **MAC™**, **Windows** or **Linx**.

MagStor includes a 3-year warranty and **lifetime support**. Customer support, troubleshooting, and updates are just a click or call away.

MagStor is available with Thunderbolt™ 3, SAS, Fibre Channel. MagStor tape drives use a standardized driver for software communication making them compatible with almost every software package that supports LTO tape drives. All MagStor products are **TAA compliant**. They're **made in Japan**, QA-tested twice, and offer the unique option of a 5-year warranty.

PERKS

- ✓ **ARCHIVE** massive amounts of data
- ✓ **TRANSPORT** physically when bandwidth poses a challenge
- ✓ **SAVE** on electricity and cost of media

MagStor is the world's first certified Thunderbolt™ 3 tape drive. Our unique dual enclosure means **double the speed** without needing to transport separate units. With our Thunderbolt™ 3 single drives, users have the option to write to tape or a solid-state hard drive.

MagStor SAS and FC LTO tape drives can be purchased as both **internal or external** drives. Internal drives will fit perfectly in the average 5.25 inch rack or enclosure.

LTO-8 Tapes Hold up to 12TB native
