

AXIS Access Card 1K, white

Safe, contactless physical access

AXIS Access Card 1K is a contactless Mifare 1K smart card that uses advanced radio frequency identification (RFID) technology to deliver secure and reliable physical access to premises. The robust, IP68-rated access card withstands substances such as perspiration, carbonated drinks, and salt water without deterioration. It can endure dynamic bending and torsion, and operates flawlessly in a wide temperature range.

- > **Contactless**
- > **Mifare 1K card**
- > **IP68-rated**
- > **Standard-sized ISO card**
- > **High frequency**

AXIS Access Card 1K, white

Properties	IP68 Material: PVC Color: White Withstands exposure to acetic acid water, artificial perspiration, carbonated sodium water, ethylene glycol, fuel B, salt mist, salt water, sugared water; humidity 95% at 50°C (122°F) for 24h, dynamic bending and torsion (4 x 250 bends).
Electronics	Frequency: HF (High Frequency) Operating frequency: 13.56 MHz Chip type: Mifare 1K Memory: 64 to 8192 byte EEPROM Anti-collision: Yes
Dimensions	ISO card: 85.6 x 54 x 0.76 mm (3.4 x 2.1 x 0.03 in)
Quantity	200 cards/box
Operating conditions	PVC: -35° to +50°C (-31° to +122°F) Composite: -40° to +70°C (-40° to +158° F)
Storage conditions	PVC: -35° to +50°C (-31° to +122°F) Composite: -40° to +70°C (-40° to +158°F)

Approvals	Standards ISO 10373, ISO 7816-1, ISO 14443
