

The C.SCOPE 4Pi

The 'Beach' Specialist

The CS4Pi is an extremely powerful metal detector designed for use where most other detectors struggle, on the beach.

The 'switch-on-and-go' principle makes the CS4Pi a joy to use for anyone, even if they've never used a detector before. Just compare that with some of our competitors whose machines require all sorts of complicated adjustments to work on wet salt beaches.

The CS4Pi has a distinctive cleverly designed control box which can quickly be detached from the stem and belt mounted around the body.

If you want to be the one to recover a share of the tons of valuables lost on beaches each year, the CS4Pi has got to form part of your detecting kit. The CS4Pi is an ever ready back-up to whatever detector you are regularly using now. The thing is, we think you'll end up preferring the back-up detector!

The CS4Pi is a high performance treasure finding tool which can perform its specialised functions better than some competitors machines at five times the price.

C.SCOPE

If you want to get serious about beach detecting, it doesn't matter what detector you are using now, you have to get yourself a CS4PI.

My sincere advice is "don't mess around with so-called dual purpose machines. These will only give you mediocre beach performance. Get yourself the beach specialist. For the little money it costs to get a CS4PI, you can't afford not to".

**Unbeatable wet sand performance.
Find what others miss!**

CS4Pi SPECIFICATION

WEIGHT 1.45 kg including batteries

FREQUENCY 1 - 5 kHz

MODE Pulse Induction Motion

Microprocessor filtering and processing of signals
On/Off tune and frequency adjustable settings
LED and Audio target indicator.

POWER 8 Alkaline 1.5 volt AA or rechargeable NiMH pack.
Battery life approximately 10 hours.
Waterproof sealed battery compartment with easy fit large knurled nut locking.

SEARCH HEAD
10" (25cm) concentric - supplied as STANDARD

CONTROL BOX in rugged pressure tested ABS moulding.
Hipmount facility.

TWO PART STEM with cam knurled nut locking and length adjustment. GRP lower stem with ultra strong bolt to the search head.

DESIGNED &
