

Make Compound Words - Using SnapWords® in the 301 Kit

Skills Used: This activity will help with sight word recognition, reading fluency and will allow children to practice making compound words.

Directions:

1. Teach the 301 SnapWords® Kit one level of words at a time.
2. Then, print out this activity and cut each group of words apart and put each into its own zip lock baggie.
3. Give each child a baggie and ask them to arrange the words in pairs to make compound words.
4. Because each baggie will contain different words, children can switch with a partner or pass the baggies around the table after they have assembled each set.
