Sentence Starters ..... 15
Story Starters ..... 16
Missing Words - comprehension ..... 17
Journal Writing - comprehension ..... 18
New Word Work ..... 19
Structural Analysis of Words:
Word Family Introduction. ..... 20
Word Family Scavenger Hunt ..... 21
Odd Man Out ..... 22
Word Sort ..... 23
Word Morph ..... 24
Word Morph 2 ..... 25
Add a Letter ..... 26
ESOL Applications: ..... 27

## 1 - INTRODUCING WORDS:

Word Recognition/Learning

## 2 - "POP UP GAME:

Word Recognition/Learning

- Use large set of word cards
- With the class near you, explain that you are going to play a game in which they will "pop up" when they hear their name and will come up to the pocket chart to choose a word they can correctly read.
- This game works best when the pocket chart is full of words, rather than displaying only a handful of words.
- Encourage children to be selecting a word when it is not their turn so they are ready when their name is called.
- Do not use this activity for teaching; rather keep it moving quickly so that no child gets bored. Stop the game as soon as interest begins to wander.

## 4 - "WHICH IS WHICH?" <br> Word Recognition/Learning

- Use the largest set of word cards.
- Using pairs of cards, ask the children "Which says $\qquad$ ?" as you name one of the words in the pair.
-This lesson could be done with two teams competing with each other for points

## 5 - "AROUND THE WORLD":

Word recognition / review

- Use largest set of words.
- Display one card to a child for him or her to identify.
- That student will read the word and then choose a word to display to another child.
-Continue around the group until all words are reviewed.

## "WAR" played in threes

-One child is the leader. He/she will lay a card down. -The player to first read the word correctly, gets card. -After going through the set, another child will become the leader.

6 - GROUP GAMES: Word Recognition - Independent Practice Use the smallest set of words for the following games:
-GO FISH - you will need four copies of each word. Use ten different words in each game. The goal of the game is to find matches of words. Children will need to read the word they want in order to ask another player for it.
-MEMORY - You will need two copies of each word.
-MAKING MATCHES - You will need two copies of each word.
Lay them out face-up. Children will take turns matching like words and reading the matches they make.
-WORD SORT - You will need one copy of each word for each pair of children. Lay all cards face up and have them sort the words into word families or into like sound spellings, such as final "ay," "ow, etc.
-MAKING SENTENCES: Let children have access to a pocket chart so they can work alone or with a partner in making sentences using the cards.

|  |  |
| :--- | :--- |
| 7 - WHOLE GROUP REVIEW OR ASSESSMENT: |  |
| Word Recognition/ Review \& Assessment | - INDIVIDUAL REVIEW OR ASSESSMENT: |
|  | Word Recognition/ Review \& Assessment |

## 15 - SENTENCE STARTERS: <br> Reading \& Writing Connection

- Put sentence starters in a pocket chart.
-Share with the children that they will be able to choose whichever starter they'd like to finish.
-More advanced children can use the starter as a story starter -All children should be encouraged to illustrate their work. -Sentence starter ideas: "I have a little...." "I want to make a....." "Do you want to..........?" "I see a funny, little....." -Ask children to read their writing to someone so they can practice reading without having the sight word cards.

## 16 - STORY STARTERS:

## Reading \& Writing Connection

-Create sentences in the pocket chart. Make them as ambiguous as you can. (Such as "Will you stop that now!" "I will get the green one.")
-Instruct the children that they may choose one sentence and build a story around what it might mean.
-Other ideas could include: "There are two up the tree" "I can see you go in there." The idea is that the child will invent the scenario and write about it and illustrate it. In the first sentence, for example, there are two of what up the tree?
-Always allow for share time, whether whole group or with partners.

17 - MISSING WORDS:
Reading \& Writing Connection - Comprehension
-Create sentences in the pocket chart, leaving a space where a missing word is.
-Children are to choose a word that will fit, write the sentence in their journal and illustrate.

EX: "I want to go to $\qquad$ with you." "Do you have to now?"

## 18 - JOURNAL WRITING:

Reading \& Writing Connection - Comprehension
-Display a sentence in the pocket chart.
-Ask the children to draw a picture of what the sentence says.
-EX: "The funny blue cat sat on me." "Will you come help me work?" "Come down here now!"
-The pictures will show whether or not the child understood the sentence.

## 19 - NEW WORD WORK: <br> Reading \& Writing Connection

-Have a new sight word for each day.

- Introduce the word to the class as detailed in activity one.
-Ask children to write the new word in his or her writing journal, stylize it, and then use it in a sentence.

EX: for JUMP, the child will stylize the word as he or she desires, then will write something like this: "My cat can jump like me."

## 20 - WORD FAMILY INTRODUCTION: <br> Structural Analysis of Words

-Select a new sight word for the day.
-Identify a target spelling (ie: the portion of the word on which you want to focus.
(EX: short "a" sound or "ig" ending, or "oo" as in "soon.") -Brainstorm other words containing that target spelling. -Write the words on a whiteboard or chart paper -Underline the target spelling in each word or write those letters in a different color.
-EX: for the sight word "AT" add words such as "cat, fat, sat," etc. For "oo" they might say "moon, noon, boot, zoo, etc.) -Learning is enhanced if children are writing on whiteboards as you generate this list together.

## 21 - WORD FAMILIES SCAVENGER HUNT:

## Structural Analysis of Words

-Identify a sound spelling such as "ow" in "cow."
-Children will search through books or through the sight word wall until they find more examples of words containing this sound spelling.
-EX: of other "ow" sight words include "down, now, how." -If the children use books to search for more words, they could work in pairs and write down all the "ow" words they can find.
-Share lists with the class.

## 22 - ODD MAN OUT:

Structural Analysis of Words
-Choose and display 3-4 words, which have a sound spelling in common and one word that does not match. (EX: "see, green, three, here").
-Ask children to study the words.
-The task is for the children to identify which word does NOT belong in the group. In the example given above, "here" does not belong, as it does not have the "ee" spelling. -In "where, there, here, three," "three" does not belong.
-In "five, like, with," "with" does not belong.

## 23 - WORD SORT:

Structural Analysis of Words

- Introduce this activity to the whole group, and then you may use it as a center activity.
-Give each group of children about 7-8 cards, and choose words for each set that combine two different target sound spellings. EX: old, cold, hold, told, now, down, how, brown. Combine picture cards plain cards you have prepared.
Shuffle.
-Ask the group to sort into two piles. They must agree on how to sort their cards, and be able to verbalize their choice when they have finished.
-In our example, children would create a stack of "old" cards and one of "ow" cards.

24 - WORD MORPH:
Structural Analysis of Words
-Choose one sight word for the day. Display in pocket chart.
-Children have markers and whiteboards.
-Identify each sound in the target word. For example, in "not," you would segment / $\mathrm{n} /$, /o/, /t//.
-Have children sound and write "not" on their whiteboards.
-Ask, "Can you change "not" into "hot?"
-Check to see if children are changing the $n$ into an $h$.
-Continue with letter replacements, such as in "cot, pot, dot

## 25 - WORD MORPH:

Structural Analysis of Words
-Continue activity 24 , but this time, after the children have written the first word (not) on their whiteboards, ask
-"Can you make "not" into "hot?"
-"Can you make "hot" into "hop?"
""Hop" into "mop?"
""Mop" into "map?"
-"Map" into "tap?"
"Tap" into "top?"
-"Top" into "stop?"

- One idea is to use the sight word of the day as the game starter each time

## 26 - ADD A LETTER:

Structural Analysis of Words
-In this version, you start with a tiny sight word, such as "a."

- Each change to the word requires adding one letter to the previous word.
-A could become at.
- At could become rat.
-Rat could become brat
- Brat could become brats
- I turns into it, it to sit, sit to spit, spit to split, split to splits.

## 27 - ESOL APPLICATIONS:

-The games and activities included in this set can be a vital tool for ESOL applications.
-The visuals provide powerful meaning-makers for language learners of any age.
-The cards become visual prompts to the meaning of English words and a visual that ties meaning to print.
-Putting sentences together guides the English Language Learner into an understanding of English sentence structure and word usage.
-Motions also aid in the understanding of the meaning of the words and phrases.
