Safety Edge & Controller Tester

IN2 Access, manufacturer of safety edges and sensing devices for the industrial door and gate market, have developed the IN2 Access safety edge & controller tester.

It's designed to help installers verify the correct operation of electrically activated sensing edges when installing or carrying out maintenance on industrial doors & gates. This new product allows the installer / engineer to test both 8K2 Ohm and NC mechanical safety edges as well as the 8K2 Ohm controller input.

Specification

Colour	Grey
Temperature range	-60 degrees Celsius ~ +230 degrees Celsius
Battery	CR2032
