SKU: CP-NEXT75B

75kg Brushless Motor for Swing Door w/ fixing plate & w/ battery

Designed for internal door applications to automate the opening and closing of swing doors up to 75kg.

Specification

Power supply	115 - 230 Vac 50/60 Hz
Max power	40W
Stand-by power	5W
Max weight of the leaf	75kg
Max width of the leaf	1000mm
Max opening angle	110°
Motor	24Vdc brushless motor with encoder
Max load of external accessories	0.5A 24Vdc
Output for electric lock	Relay with N.O. / N.C. contact
IP Rated	IP32
Operating temp	-15°C +50°C
Opening speed (up to 90 °)	Adjustable from 2 to 12s
Closing speed	Adjustable from 4s to 12s
Pause time	Adjustable from 0.5s to 60s
Operation	Motor-powered closing

Product

Dimensions

Height – 60mm
Width – 420mm
Depth – 76mm

+44 (0)1691 655150

SKU: CP-JMB/KS-3

Three Position Key Switch (hold open/ off/auto) latching

Three Position Key Switch

Specification

Operation	Latching
Supplied with	High impact plastic backbox
Security screws	Allen key type
Contacts	Voltage free contacts
Power	12-24 VDC
IP rated	IP54
Keys	Supplied with 2 keys
Surface	Etched legend

Product

Dimensions

Height	– 120mm
Width	– 50mm
Depth	– 47mm
Weight	– (boxed) 250g
Weight	– (unboxed) 210g

SKU: CP-NEXT-BAS

Standard Articulated Arm (outswing)

Designed to be used with the CP-NEXT75B motor

Product

UniScan

Infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650

Practical, flexible, slender

- **Fully automated starting up:**
quick and easy via keystroke
- **Automatic mounting height detection:**
saves time and facilitates installation
- **Top design:**
the smallest sensor in its category
- **Individually adjustable AIR points:**
for perfect adaptation to the local situation

UniScan

Active infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650

Highest level of safety for everyday operation

Safety for every entrance – UniScan provides safety wherever people enter and exit every day. UniScan's dense detection field offers the greatest possible protection, even for small children and people with impaired mobility.

Quick and easy installation

UniScan will convince you not only due to its high level of safety, but it also reduces the installation and start up time. All it takes is one keystroke and the device is taught and set – fully automated. Thanks to its slender and elegant design with small dimensions, the sensor is unobtrusive and can also be used when space is at a premium.

Your advantages

Quick installation and starting up

- Several sensors are simply connected by means of a flat cable

- No tools needed to adjust mechanical settings

- Automatic startup at the push of a button, LED display

Universal creation

- Testing method can be selected in accordance with the respective drive types
- The detection height above ground can be adjusted between 10 cm and 100 cm
- No interference through synchronisation of the optics
- Individual turning off of single beams

Compact dimensions

Field characteristics for more safety

- Close array of beams (471 x 60 mm at 2.2 m mounting height) with 8 beams and very short reaction time (< 50 ms)
- Mounting height up to 3.0 m
- Power saving mode (DIN 18650-compliant)

Extended accessories

Single components of the UniScan, such as the optical unit US beam and various profiles, are available at all times. An additional remote control enables sensors that have already been installed to be adjusted. The Y-Adapter offers a simple cabling solution with only one cable for two sensors on both sides of the door. The two door loop sets DLP 6 and Door Loop provide a clean connection to the wall.

UniScan door set

Set for security

UniScan is also available as a user-friendly door set.

User-friendly, complete and clear

All components are supplied in a single package: the individual parts are clearly arranged. This provides you with everything you need to secure a door at your fingertips.

Quick installation and startup without tools

The Y-Adapter clips into profile. Thanks to its practical plug-in design, both sides of the door can be connected based on the plug-and-play principle. The profile end covers are also pluggable and can be assembled without tools.

Safety for every application

Situation

Access via a swing door

Solution

- The main and secondary closing edges are monitored on both sides of the door for optimum protection of the entire door swing to avoid collisions
- Due to short reaction time, door movements remain smooth

Advantages

- UniScan perfectly secures all edges
- The matching device for every door: Length and number of sensors can be chosen

Situation

Access via a revolving door

Solution

- An on-board collision protection for revolving doors provides smooth operation and minimises risk of accidents

Advantages

- Persons and objects are detected easily and without contact
- Possible collisions and accidents involving people at the door are thus avoided

Microwave motion sensor Merkur 2 with electronically adjustable field

Protects primary closing edges in revolving doors

Active infrared sensor SpotScan with detection altitude of up to 3 m

Technical data

Mechanical data

Housing material	Aluminium
Front cover	Plexiglass PMMA (black)
Weight (US beam)	90 g
Measurements (US beam)	300 x 31 x 20 mm
Weight (UniScan II, 1100 mm)	910 g
Type of connection	Plug-in screw terminal

Technological data

Technology	Active infrared (triangulation principle)
Beams	8 per US beam
Power saving mode	5 beams per US beam activated (factory setting)
Mounting height	1.7 – 3.0 m
Field size (at 2.2 m)	471 x 60 mm
Mode of operation	on-board
Reaction time for detection	< 50 ms
Performance Level	PLd, Cat. 2 (EN ISO 13849-1)
Max. number of sensors linked together	4 (with DC supply voltage only)

Electrical data

Supply voltage	15–37 V DC ± 0% 15–26 V AC ± 0%, 50/60 Hz AC only for single device
Making current	Max. 500 mA
Power consumption	Max. 3.3 W (138 mA with 24 V per unit)
Test input	High/Low active, Pull up/Pull down Response time to test signal High level < 30 ms (typical 3 ms) Min. 5 V DC – max. 24 V DC / I = < 6.5 mA
Output	Relay 40 V DC, 40 V AC, 1 A
Relay holding time	0–10 s (adjustable)

Environment conditions

Protection category	IP54 (EN 60529)
Operating temperature	–20°C to +60°C
Atmospheric moisture	Max. 95% relative, non-condensing

Norms

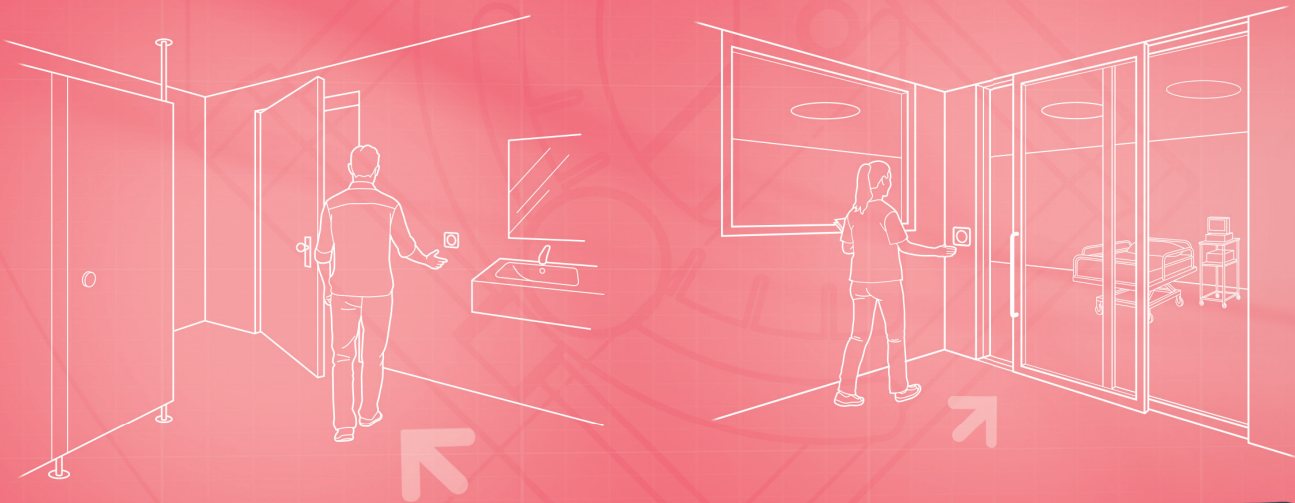

Immission	EN 61000-6-1 EN 61000-6-2
Emission	EN 61000-6-3 EN 61000-6-4
EC type certificate in accordance with	EN 16005 DIN 18650-1 EN 12978 EN ISO 13849-1 EN 61508

Advice

Technical data and recommendations for our products are empirical values and serve as orientation guide for the user. Information given in brochures and data sheets do not guarantee special product characteristics. This does not include special characteristics which, in single cases, we confirm individually or in written form. We reserve the right to make modifications resulting from further technical development.

CleanSwitch

Contact-free switch for convenient activation of entrances
with strict hygiene and design requirements

Hygienic, attractive, integrable

- Contact-free, hygienic door opening
- Attractive design with visual feedback
- Compatible with standard flush-mounted boxes

reddot design award
winner 2018

CleanSwitch

Contact-free switch for convenient activation

Hygienic in every application

Any place in which groups of people are found can be a breeding ground for germs and other pathogens. Contact surfaces – and in particular, door handles – are responsible for spreading vast amounts of bacteria and viruses, some of which can pose a real risk to health. This becomes critical when it affects healthcare facilities. Strict hygiene standards are also imposed in the catering industry, as well as other fields in which food is prepared.

CleanSwitch provides a contact-free, hygienic method of opening doors. It works by means of a deliberate hand gesture within the detection range of 10 to 50 centimetres – helping to stop germs in their tracks. Thanks to its attractive design featuring coloured LED feedback, CleanSwitch is an appealing, user-friendly addition to its environment. It takes just a few minutes to get the activation switch up and running and installation can be carried out in any standard flush-mounted box. The highly durable front can be treated using standard surface disinfectants in hospital areas. To ensure that it can be used without any problems in particularly moist or wet environments, CleanSwitch offers reliable protection that meets IP65.

Benefits for you

Hygiene

CleanSwitch has been specifically developed for use in buildings subject to strict hygiene requirements, such as healthcare facilities, sanitary areas and the catering industry. It activates entrance points using a contact-free method – a deliberate gesture made by the user – and otherwise keeps doors closed. This helps to prevent the spread of germs. CleanSwitch can also be treated with any standard cleaning agent or disinfectant.

Easy installation

The intelligent way in which the system has been designed ensures it is compatible with all standard flush-mounted boxes. CleanSwitch is extremely quick and easy to install. Set-up of the device is an intuitive process that requires no tools – and the integrated short guide provides a helping hand.

Customising

CleanSwitch's visually appealing, straightforward design can be adapted in a whole range of ways to suit customers' preferences. It takes just a few seconds to change the colour, level of brightness and mode of the optical feedback – without tools. Not only that, but Bircher also supplies a wide selection of pictograms that can be printed onto the front of the device to make it even more user-friendly. Customised pictograms and logos can also be applied on request.

Reliable in every application

Situation

Hospitals, clinics, retirement homes

Solution

- CleanSwitch provides a convenient, contact-free entrance activation method that does away with the need for contact with door handles – which are often contaminated. CleanSwitch can be treated with any standard cleaning agent or disinfectant. The high-contrast LED feedback is easy to identify for people with impaired vision.

Situation

Public sanitary areas

Solution

- CleanSwitch provides a contact-free method of opening automatic doors to public sanitary areas, and prevents the spread of bacteria and other pathogens.

Situation

Catering industry

Solution

- CleanSwitch activates the door by means of a gesture. This means that the entrance to the kitchen is only opened when required – providing service staff with a convenient, hygienic door-opening solution.

Technical data

Mechanical data

Material	ASA / PC
Dimensions	88 × 88 × 38 mm (L × W × D)
Weight	55 g
Connection type	Plug terminals
Colour	White

Electrical data

Operating voltage	12–24 V AC ±10% (50–60 Hz) 12–24 V DC +20%/–10%
Frequency range	50–60 Hz
Power consumption	~ 1 W
Output	Potential-free relay with changeover contact
Max. switching voltage	(DC) 1 A to 30 V, 0.5 A to 60 V (AC) 1 A to 50 V
Max. switching capacity	30 W (DC) / 50 VA (AC)
Output fall-delay time	Relay fall-delay time 0.3 s LED fall-delay time 2 s

Technological data

Technology	Radar
Transmission frequency	24.125 GHz
Detection range	0.1–0.5 m
Detection mode	– Pulse mode: Detector is triggered by movement of hand – Toggle mode: first movement door open / second movement door closed
Detection speed	Min. 5 Hz or ± 3 cm/s Max. 200 Hz or ± 1.2 m/s

Ambient conditions

Protection class	IP65
Storage / operation temperature	–20 °C to +60 °C
Air humidity	< 95% rel., non-condensing

Electromagnetic compatibility standards

Directives	RoHS 2011/65/EU RED 2014/53/EU
Immision	EN 61000-6-2
Emission	EN 61000-6-3
