

The radar innovation with the electronically adjustable double field module

Merkur 2

Microwave motion detector
for automatic doors

Intelligent, precise, versatile

■ **Optimal flow of persons:**
The only unique and homogenous radar field with SMD+ function detects the smallest movements

■ **Versatile usable:**
Practical adjustments for any type of doors, inside and outside

■ **Short commissioning time:**
Pre-programmed comfort settings and electronically adjustable dual field planar module

■ **Energy-saving:**
Awards involuntary openings of the door by means of direction recognition and blanking-out of cross traffic

Merkur 2

Microwave motion detector for automatic doors

The innovative all-rounder

Thanks to its extremely high versatility, Merkur 2 leads the way and can be used on virtually any type of automatic door. With its totally reliable detection, Merkur 2 provides a smooth flow of people and also ensures savings on energy and costs! The intelligent sensor system has an optional direction recognition and thereby makes sure that the door only opens when people are approaching or leaving. The door closes again immediately afterwards.

Hi-tech 'wonder' with dual field planar module

The second generation of Merkur is available with a radar field that is more symmetric and more sharply differentiated than before. Switching between wide or narrow field can be done fully electronically by remote control or by push-buttons on the sensor. Thus, Merkur 2 is adjusted and ready to operate extremely quickly.

Your benefits

Versatile usable for every situation

- Pre-programmed comfort settings for a rapid commissioning
- The most reliable detection with a clearly differentiated radar field
- Energy-saving by direction recognition
- Avoidance of involuntary door openings by blanking-out of cross
- Electronically switching between a wide and a narrow field
- SMD+ as a new detection field for movements of < 5 cm/s

Field characteristics

- Electronic field geometry settings options for a wide and narrow field (via remote control or via buttons at the detector)
- Can even be used with wide passage dimensions and high-level lights
- Mounting height up to 4 m

Further accessories

High-quality accessories make the innovative Merkur 2 so versatile that it can be used in the most widely differing applications.

RegloBeam 2 remote control

Using this, the sensor can be rapidly configured and parameters can be individually adjusted for the respective situation

MIS ceiling installation kit

Using the MIS ceiling installation kit, the sensor can be discretely and almost invisibly built-in to the ceiling

MCAP rain and snow cover

The MCAP cover for external use protects the sensor against rain and snow

MCL semicircular adapter

The MCL adapter with its concave back provides a flat surface to mount the sensor on revolving and curved doors

Reliable in every application

Situation

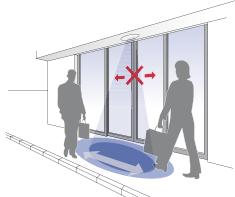

Activation of sliding doors, pedestrians on the pavement

Solution

- Ensures an optimal flow of people with reliable activation
- Intelligent movement detection: only activated when people directly come towards the door. Ideal for access in passages/on pavements

Benefits

- No unnecessarily opening/prolonged opening time of the door thanks to direction recognition
- The depth of the field can be reduced to a minimum and still the sensor ensures an optimal flow of people
- Field size up to a width of 5.0 m
- No involuntary opening of the door due to blanking-out of cross traffic/people recognition

Situation

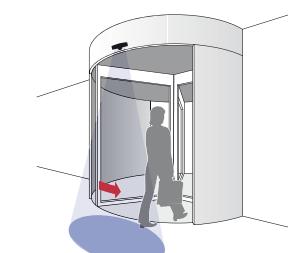

Activation of revolving doors

Solution

- With a special semicircular adapter, Merkur 2 can also be installed on revolving doors

Benefits

- Efficient blanking-out of cross traffic
- Small and precisely selectable detection field

Situation

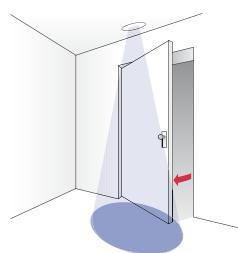

Activation of swing doors

Solution

- The sensor for automatic doors even in the most confined spaces

Benefits

- Thanks to the blanking-out of cross traffic, the door leaf is not detected and so the door is not triggered
- Especially suitable for ceiling installation

Situation

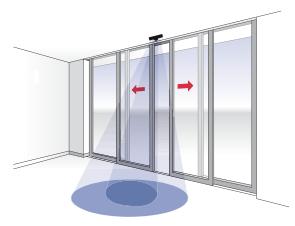

Installation in elderly and disabled homes

Solution

- Merkur 2 with a specially pre-programmed comfort setting

Benefits

- Even the very slowest-moving persons (< 5 cm/s) and those in wheelchairs are safely detected with the new SMD+ field
- Almost stationary objects are recognised in the detection field. The door stays open until the person has safely passed through

Order details

Item no.	Description
Merkur 2 Standard	
219184	Merkur 2 Without direction recognition Changeover contact, Plug-in screw terminal
219190	Merkur 2 ES With direction recognition Changeover contact, Plug-in screw terminal
219193	Merkur 2 ES.C With direction recognition Changeover contact, RJ12 socket
Accessories	
292393	Bi-directional remote control RegloBeam 2
213459	Cover Merkur black
213462	Cover Merkur white
247438	Cover Merkur silver
212840	MIS – ceiling installation kit
212837	MCAP – rain and snow cover
212527	MCL 1.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 2.0–3.6 m 175 x 40 x 5.4 mm (W x H x T)
212528	MCL 2.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 3.6–6.0 m 175 x 40 x 3.7 mm (W x H x T)

Technical specifications

Technological specifications	
Technology	Double field radar module (24.125 GHz)
Transmitter power	< 20 dBm
Size of narrow field (at 2.2 m)	Min. 0.7 x 0.6 m (W x D) Max. 2.7 x 1.9 m (W x D)
Size of wide field (at 2.2 m)	Min. 1.1 x 0.6 m (W x D) Max. 4.7 x 1.7 m (W x D)
Mechanical specifications	
Material	Cover: PC Base plate: ABS
Dimensions	176 x 62 x 54 mm (W x H x D)
Weight (without cable)	150 g
Types of connections	Plug-in screw terminal or RJ12 plug
General electrical specifications	
Voltage	12–36 VDC 12–28 VAC
Operating current	Approx. 50 mA at 24 VDC, 24 °C
Environmental conditions	
Mounting height	Max. 4.0 m
Type of protection	IP54
Operating temperature	-20 °C up to +60 °C
Humidity	0 – 90 % rel., non-condensing
Standards	
Immissions	EN 61000-6-1 EN 61000-6-2
Emissions	EN 61000-6-3 EN 61000-6-4
Specific specifications for Merkur 2 and Merkur 2 ES	
Output	Potential-free changeover contact 48 VACDC 0.5 A AC / 1 A DC 60 VA / 30 W

Note

Technical details and recommendations on our products are based upon experience and represent guidelines for the user. Details in brochures and specification sheets do not guarantee any special product features, apart from those which we confirm in individual cases. We reserve the right to make changes as the result of technical developments.

Additional products

UniScan	Infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650
PrimeFamily A	The complete solution for activating and protecting sliding doors in accordance with EN 16005 and DIN 18650

sensing the future

UniScan

Infrared presence detector for
automatic swing doors and
revolving doors in accordance
with EN 16005 and DIN 18650

Practical, flexible, slender

- Fully automated starting up:
quick and easy via keystroke
- Automatic mounting height detection:
saves time and facilitates installation
- Top design:
the smallest sensor in its category
- Individually adjustable AIR points:
for perfect adaptation to the local situation

UniScan

Active infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650

Highest level of safety for everyday operation

Safety for every entrance – UniScan provides safety wherever people enter and exit every day. UniScan's dense detection field offers the greatest possible protection, even for small children and people with impaired mobility.

Quick and easy installation

UniScan will convince you not only due to its high level of safety, but it also reduces the installation and start up time. All it takes is one keystroke and the device is taught and set – fully automated. Thanks to its slender and elegant design with small dimensions, the sensor is unobtrusive and can also be used when space is at a premium.

Your advantages

Quick installation and starting up

- Several sensors are simply connected by means of a flat cable
- No tools needed to adjust mechanical settings
- Automatic startup at the push of a button, LED display

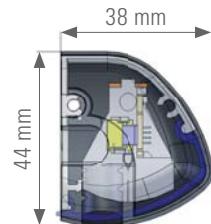

Connection with flat cable Adjustment of detection angle

Starting up via keystroke

Universal creation

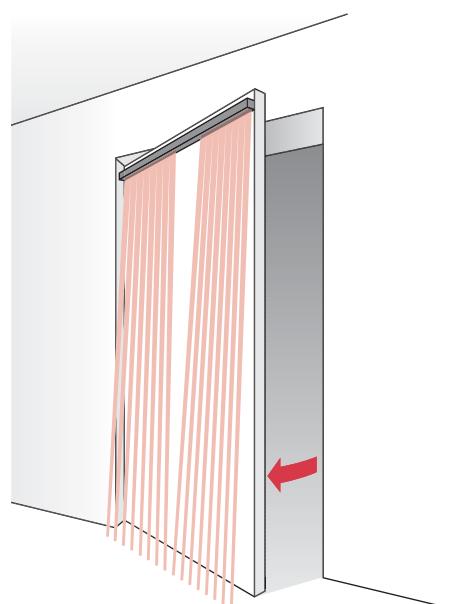

- Testing method can be selected in accordance with the respective drive types
- The detection height above ground can be adjusted between 10 cm and 100 cm
- No interference through synchronisation of the optics
- Individual turning off of single beams

Compact dimensions

Field characteristics for more safety

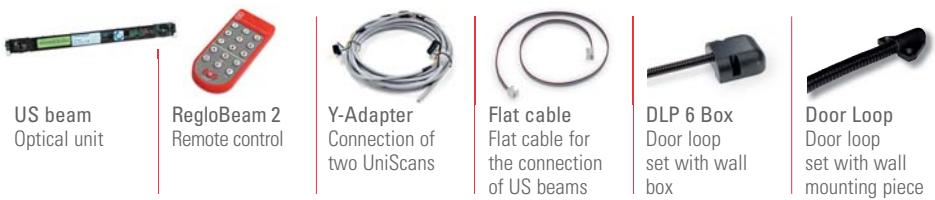

- Close array of beams (471 x 58 mm at 2.2 m mounting height) with 8 beams and very short reaction time (< 50 ms)
- Mounting height up to 3.0 m
- Power saving mode (DIN 18650-compliant)

Extended accessories

Single components of the UniScan, such as the optical unit US beam and various profiles, are available at all times. An additional remote control enables sensors that have already been installed to be adjusted. The Y-Adapter offers a simple cabling solution with only one cable for two sensors on both sides of the door. The two door loop sets DLP 6 and Door Loop provide a clean connection to the wall.

UniScan door set

Set for security

UniScan is also available as a user-friendly door set.

User-friendly, complete and clear

All components are supplied in a single package: the individual parts are clearly arranged. This provides you with everything you need to secure a door at your fingertips.

Quick installation and startup without tools

The Y-Adapter clips into profile. Thanks to its practical plug-in design, both sides of the door can be connected based on the plug-and-play principle. The profile end covers are also pluggable and can be assembled without tools.

Safety for every application

Situation

Access via a swing door

Solution

- The main and secondary closing edges are monitored on both sides of the door for optimum protection of the entire door swing to avoid collisions
- Due to short reaction time, door movements remain smooth

Advantages

- UniScan perfectly secures all edges
- The matching device for every door: Length and number of sensors can be chosen

Situation

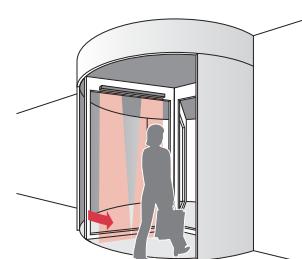

Access via a revolving door

Solution

- An on-board collision protection for revolving doors provides smooth operation and minimises risk of accidents

Advantages

- Persons and objects are detected easily and without contact
- Possible collisions and accidents involving people at the door are thus avoided

Additional products

Activates automatic doors

Microwave motion sensor Merkur 2 with electronically adjustable field

Protects primary closing edges in revolving doors

Active infrared sensor SpotScan with detection altitude of up to 3 m

Technical data

Mechanical data

Housing material	Aluminium
Front cover	Plexiglass PMMA (black)
Weight (US beam)	90 g
Measurements (US beam)	300 x 31 x 20 mm
Weight (UniScan 2.1100)	910 g
Type of connection	Plug-in screw terminal

Technological data

Technology	Infrared
Beams	8 per US beam
Power saving mode	5 beams per US beam activated (factory setting)
Mounting height	1.7 – 3.0 m
Field size (at 2.2 m)	471 x 58 mm
Mode of operation	on-board
Reaction time for detection	< 50 ms
Performance Level	PLd, Cat. 2
Max. number of sensors linked together	4 (with DC supply voltage only)

Electrical data

Supply voltage	15–37 VDC ± 0% 15–26 VAC ± 0% AC only for single device
Making current	< 500 mA
Power consumption	3.3 Watt (138 mA with 24 V per unit)
Test input	High/Low active, Pull up/Pull down < 30 ms (typical 3 ms) High level
Output	Min. 5 V DC – max. 24 V DC / I = < 6.5 mA
Relay holding time	Relay 40 VDC, 40 VAC, 1 A 0–10 s (adjustable)

Environment conditions

Protection category	Suitable for application IP54
Operating temperature	-20°C to +60°C
Atmospheric moisture	< 95%, non condensation

Norms

Immission	EN 61000-6-1 EN 61000-6-2
Emission	EN 61000-6-3 EN 61000-6-4
EC type certificate in accordance with	EN 16005 DIN 18650 EN 12978 EN 13849-1 EN 61508

Advice

Technical data and recommendations for our products are empirical values and serve as orientation guide for the user. Information given in brochures and data sheets do not guarantee special product characteristics. This does not include special characteristics which, in single cases, we confirm individually or in written form. We reserve the right to make modifications resulting from further technical development.
