

# Vitamin D3

## Vitamin D3 5000 IU gelcaps

Vitamin D3, considered both a hormone and a vitamin, is essential to the body's absorption of calcium. Natural vitamin D3 (cholecalciferol) is four times more potent than synthetic vitamin D2. Vitamin D3 has a significant impact on bone health and the immune system. Our convenient Vitamin D softgels supply this key vitamin in a highly-absorbable liquid softgel form.

Vitamin D3 provides support for:

- **Calcium absorption and bone health**
- **Immune Health**
- **Dental Health**
- **Breast, prostate, and colon health**
- **Cardiovascular Health**

Vitamin D is normally obtained from the diet or produced by the skin from the ultraviolet energy of the sun. However, it is not abundant in food. As more people avoid sun exposure, Vitamin D supplementation becomes even more necessary to ensure that your body receives an adequate supply.

### Supplement Facts
