## Shh! Noiseless Waist Belt

Waist Belt Loved By Many Moms!  
No need to wake up the baby  
with the sound of the Velcro.  
With patented technology, You can  
take off the waist belt without noise.

The noiseless waist belt is Pognae's technology  
with patents registered.  
It is currently being protected by the law.  
(Korean patent registered, PCT patent registered)

### How to use the Noiseless Waist Belt

### Four Waist Supports Making the Waist Comfortable

The four waist belts inserted  
in the waist belt attaches according  
to the waist curve of the user allowing  
you hold the baby comfortably  
for a long time.

## Non-slip Silicon Preventing Slipping

To prevent the baby's hips from slipping, silicon outstanding in slip-prevention compared to general prevention pad was used.

## Safety Always Comes First Dual Lock Buckle

The hipseat and the backerst were connected with YKK Auto Lock Zipper Safety was even more enhanced by locking once more with dual lock buckle.

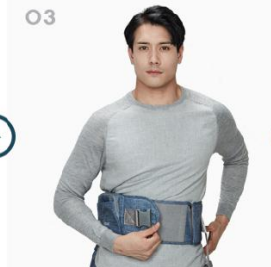

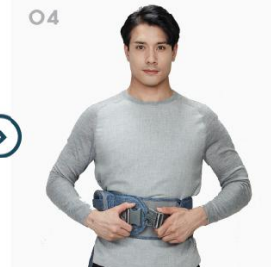

## Wide zipper pocket with sufficient size

The wide zipper pocket attached on the waist belt allows the safe storage of cell phone and card wallets, allowing convenient usage in going out.

# How to wear the All New No.5

<p>01</p> 	<p>02</p> 	<p>03</p> 	<p>04</p> 
<p>Place the hipseat to the back, and place the waist belt on the waist above the pelvis.</p>	<p>Breathe in as much as possible to connect the Velcro of the waist belt as tightly as possible.</p>	<p>The upper and lower Velcro must be on each other perfectly to bear weight firmly.</p>	<p>Lock the buckle and pull the waist belt. The tighter the belt, the firmer the weight on the waist for more comfortable usage.</p>
<p>05</p> 	<p>06</p> 	<p>07</p> 	<p>08</p> 
<p>Turn the waist on the back to the front.</p>	<p>Place the baby on the seat.</p>	<p>Support the baby hand and put on the shoulder belt with the other hand.</p>	<p>Put on the remaining shoulder belt in the same method. Check whether the baby is sitting properly.</p>

- ⚠️ • Attach the Velcro on the waist belt and secure waist buckles.
- If only the hipseat is used, wear the waist belt tightly on the thin waist.
- When using as hipseat carrier, place the waist belt on the thin part of the waist, and lower the waist belt slightly toward the pelvis.

# Various Uses of All New No.5

 <p>Sling posture</p>	 <p>Facing Each Other</p>	 <p>Facing Front</p>	 <p>Facing Front (Hipseat Carrier)</p>
 <p>Hugging (Hipseat Carrier)</p>	 <p>Holding on Back (Hipseat Carrier)</p>	<p>The Ultimate Solution for Moms Carrying Babies Day and Night! </p> <p>Babies under 6 months are often carried indoors. When babies are held for prolonged periods of time, it may strain the wrist joints of mothers. Hipseats could be used to help. If the baby is laid in <b>sling position</b> on the hipseat, the baby's weight is evenly distributed, <b>helping to relieve wrist pain.</b></p>	

# Use All New No.5 in the Following Circumstances

## When to Use The Hipseat

- ① When having to carry the baby at home frequently
- ② When the wrists hurt from postpartum stroke
- ③ After breastfeeding, burping the baby
- ④ When putting the baby to sleep while soothing
- ⑤ When the baby carrier is burdensome
- ⑥ When needing to hold the baby fast
- ⑦ When going out for a short distance

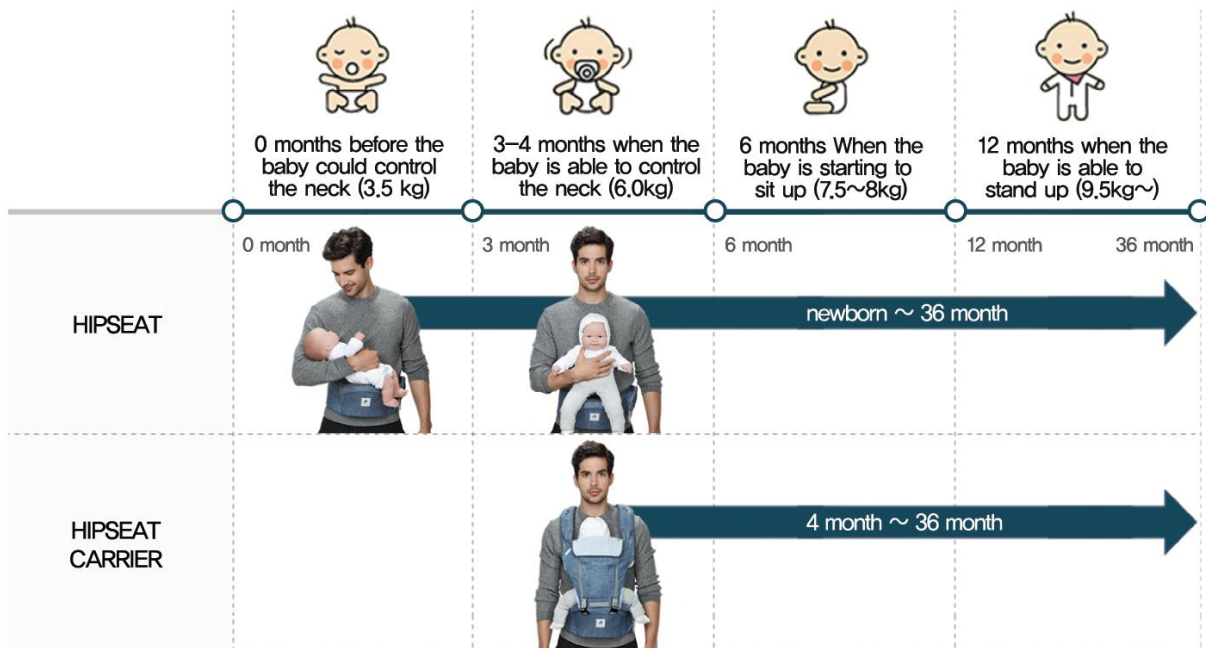

## When to Use The Hipseat Carrier

- ① When the baby becomes too heavy to be carried only in hipseat
- ② When holding a curious baby in kangaroo position for a long time
- ③ When the baby feels that the baby carrier is stuffy or hot
- ④ When the mom needs to use the two hands freely
- ⑤ When going out for long distances

## Recommended Usage for each Age

\* The usage period of the product may differ according to the growth of the baby.

# All New N<sub>5</sub> SPECIFICATION

## 01

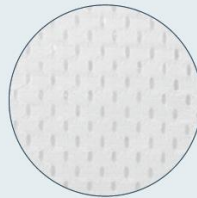

### Two Sleeping Hoods

Strong sunlight is blocked for the comfortable sleep of the baby, and the baby is kept from UV lights, yellow dust and other dust. Also, the baby is protected from cool air, and heating is enhanced. The hood can be chosen from summer type and four seasons type.

<Four Seasons Product>

<Summer Product>

## 02

### Headrest

The head and the neck of the baby is supported to enable usage of the baby carrier and hipseat in proper posture, preventing the baby head from drooping backward.

## 03

### Wide Zipper Pocket

The wide zipper pocket attached on the waist belt allows the safe storage of cell phones and card wallets, allowing convenient usage in going out.

## 04

### Mesh Inner Fabric

Mesh fabric outstanding in permeability and moisture permeability was used for the waist belt inner fabric for more fresh wear, and the waist belt pushing outward in long-term usage was minimized.

## 05

### Slide Chest Buckle

As the buckle fixing the two shoulder belts, the slide buckle of the shoulder belt could be adjusted according to the position the mother wants.

## 06

### Mesh Backrest

Rolling down the cover reveals a highly air permeable mesh panel. It is optimal for hot weathers and babies with much body heat.

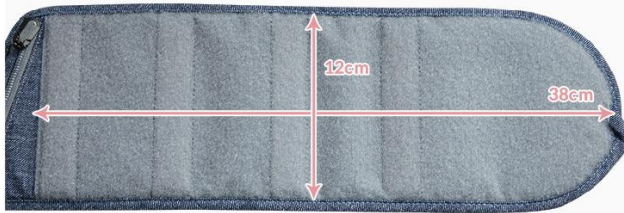

# 07

## Prevention of the Legs Being Scratched

The soft organic fiber and cushion interior material prevents the baby sensitive legs from being scratched.

# 08

## Stable Wide Velcro

The wide Velcro could be attached firmly, enhancing support to support the baby waist firmly and effectively.

# 10

## Non-Toxic EPP Molding

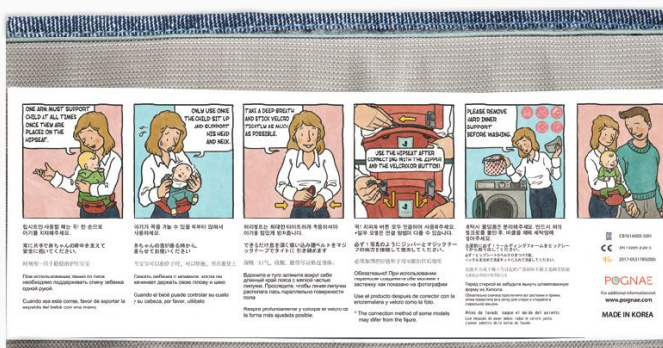

Light and firm non-toxic EPP molding foam is used, not being deformed and used semi-permanently.

# 11

## illustrated Safety Warnings

The warning was illustrated to be understood easily.

# 09

## Bib, spit pad

They are attached to the shoulder belts on the two sides and the headrest, allowing clean usage. Even if they are used for a long time with snap buttons, the shape is not deformed, not irritating the baby's face.

# 12

## HR Foam Shoulder Belt

The HR foam of highest quality and highest have been used for the shoulder belt, having good cushion and recovery. Also, the user's shoulder pain is minimized and fatigue is alleviated without deformations, even with long usage.

## Cautions in Connecting the Hipseat and the Backrest

Zip the hipseat and the backrest together to the end.

If the zipper handle is pressed to the right as in the photo, it is locked, preventing the zipper from opening.

Connect the buckles connecting the hipseat and the backrest.

Connect all zippers and buckles as in the photo.

# All New N<sup>0</sup><sub>5</sub> CAUTION

## Cautions against Falls

Please check the following to prevent falls.

- Babies with small body sizes may fall through leg holes.
- Check whether the baby is sitting on the center of the seat with its legs spread.
- The balanced state in which the user is standing influences the movement of the user and the baby.
- Caution in bending forward or leaning.
- Check buckles, zippers, snap buttons straps and other adjustments.
- Check the state of the product in every usage.
- When holding the baby or carrying the baby on the back, falls may occur.  
Place the baby down safely before loosening the waist belt.
- The user's hands must be in the position protecting the baby in preparation for possible hazards.

## Cautions in Usage

- This carrier was designed for babies weighing 3.5kg ~ 20kg.
- This carrier was developed for daily activities. Never use for athletic activities.
- When the user is not used to the product, use on cushioned floor and use with the help of an assistant.
- Learn how to use the product in front of the mirror.
- When using the carrier, do not use electric products or cook. Do not drink hot beverages or eat hot food.
- Check whether the baby dislikes the carrier or feels tired after first using the baby carrier.

# All New N<sup>0</sup><sub>5</sub> CAUTION

## Information for Comfortable Use

- When using the hipseat without backrest connection, wear on the thin part of the waist rather than the hips.
- When connecting the hipseat and the backrest, wear the hipseat on the waist before pulling down to the hips.
- When the waist belt is loose, the hipseat may droop down and pressure the hips. Wear the product tightly.
- The hipseat must be turned to the back of the waist to attach the Velcro tightly.  
(Refer to Photo 1 in the manual describing how to wear the hipseat.)
- The two parts of the waist belt Velcro must be attached accurately to be able to support the baby.
- When the Velcro of the hipseat touches the fabric (the edges) and the user's clothing, the product may have lint.

## Cautions in Washing

Check the contents of the caution before washing.

The product cannot be exchanged or refunded from damages occurring from wrong washing and drying.

- Because the organic cotton does not use harmful fixatives (synthesized substances to prevent the changing of the color), natural fading may occur after washing and drying. This is not a defect of the product, so repairs cannot be made.
- Make sure to take out the molding foam from the hipseat before washing.
- Make sure to wash by attaching all Velcro of the waist belt, and by locking the buckles.
- When washed without attaching the Velcro, fuzz may occur from damages of the fabric.
- Wash in cold water.
- Do not dip in water for long time, and do not wash with hot water or boil the product.
- Wash lightly with water.
- In drying, avoid UV lights and dry in shades with good air permeability.
- Wash small stains with wet towel by tapping or wash in part, and avoid machinery washing.
- Drying with drum washing machines and dryers may cause shrinking, damages and deformation of the product, so dry in the natural state.
- If alkali substances are included in the baby product detergents, it may be a cause for discoloration and bleaching, so make sure to use neutral detergents.
