according to the growth  
of the baby (pad and cushion)

Cushioning helping the  
baby's sleep

## Bamboo Cotton

With antibiotic character, bamboo fiber is able to maintain freshness and cleanliness for a long time.

## Detachable Pad and A Cushion

The can be detached according to the stage of growth. Babies older than 2 months should use only the A cushion,

## 100 Air Holes Maximizing Permeability

100 air holes and 3D mesh material with outstanding permeability provides cool and fresh wear.

## Infant Waist Bending Protection

The product supports the head, waist and hips stably, allowing growth in appropriate posture.

## Soft Cushioning

By protecting the baby softly, the baby feels comfortable even with long wear.

# HOW TO USE

- 1 Wear the baby carrier's waist belt.
- 2 Wrap the baby with infant insert.
- 3 Take the infant insert wrapping the baby with two hands and place over chest.
- 4 Wear one shoulder belt of the baby carrier.
- 5 Wear the other shoulder belt of the baby carrier.
- 6 Secure the buckle behind the neck to prevent the waist belts from drooping.
- 7 Adjust the strap according to the body shape.
- 8 Check the baby's state.
- 9 Babies over two months who are too large to use the pad should use A cushion only. (Support the A cushion under the baby's hips)

- \* The usage method and usage period of the product may differ according to the baby's growth.
- \* If the knees of the baby pointing toward the mother's stomach feels uncomfortable, spread them outward. (frog posture)
- \* If you are not used to the usage method, use on sofa or bed first.
