HOW TO USE NO.5 PLUS

NUMBER FIVE PLUS CARRIER

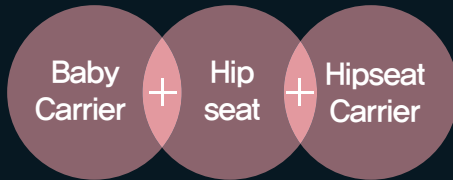

All in One

Beyond All In One

No.5 Plus is a All In One carrier combining the functions of baby carrier, hipseat and hipseat carrier. By realizing the true functions of baby carrier and hipseat rather than a crude product, this product provides perfect function embodying every need. No.5 Plus will present the best satisfaction to the mother and the best comfort to the baby.

3 in One

Three Functions in One Product All in One POGNAE NO5 PLUS

Hipseat

Baby Carrier

Hipseat Carrier

No.5 Plus is Different

CHECK POINT

Now enjoy the more strong all-in-one, No.5 Plus.

01

Noiseless Freedom Granted by the Zipper

Do not wake up the baby anymore with the sound of Velcro. The product could be taken off softly without any noise with patented technology.

“Shh, don't wake up the baby.”
Open up the waist belt softly with the zipper!

02

Hold the infant comfortably with Newborn Support

Because of the Newborn Support in No,5 Plus, even infants can use the product. The baby is wrapped comfortably and their sleep is assisted.

Characteristics of Newborn Support

1 Ergonomic Design

10cm-width seat supports the baby's hips comfortably.

With an ergonomic design considering the infant's movement, the movements of the arms and legs are free.

2 Stability

The infant is not pressurized but wrapped comfortably, helping comfortable sleep.

3 Convenient Usage Method

Because the product contains 4 hooks, even unskilled mothers are able to hold the baby comfortably.

03

The leg width can be adjusted in 3 steps according to the growth and position of the baby

STEP1

10cm

Infants are able to use the No.5 Plus. The small hips and the legs of the baby are supported comfortably and stably.

STEP2

16cm

The appropriate size in using the baby carrier in the forward-facing posture or hipseat. However, even if the leg width is adjusted, the seat size wrapping the baby's hips is maintained, making the baby's sitting posture comfortable.

STEP3

29cm

Size appropriate for baby carrier postures of the mother facing the baby and in piggyback. However, even if the leg width is adjusted, the seat size wrapping the baby's hips is maintained, making the baby's sitting posture comfortable.

Non-Slip!

04

Non-slip Silicon Preventing Slipping

To prevent the baby's hips from slipping, silicon outstanding in slip-prevention compared to general prevention pad was used.

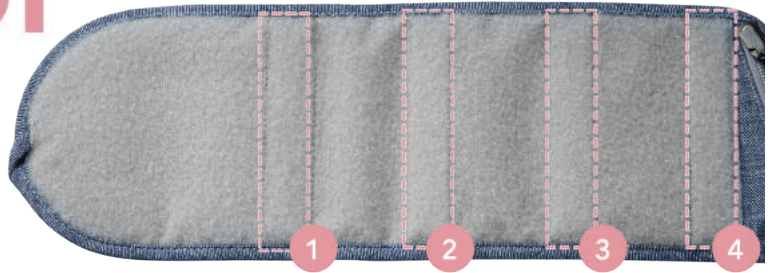

Silicon

05

Four Waist Supports Making the Waist Comfortable

The four waist belts inserted in the waist belt attaches according to the waist curve of the user, allowing you to hold the baby comfortably for a long time.

Support
UP

06

Cool in Hot Summers Stay Cool

Permeable mesh can be used with the cover removed, allowing cool usage for babies with much body heat and in summers.

Adding More Functions Without Omitting Any

The scrupulous functions for mothers
and babies.
No.5 Plus is your ultimate choice.

01

Two Sleeping Hoods

Strong sunlight is blocked for the comfortable sleep of the baby, and the baby is kept from UV lights, yellow dust and other dust. Also, the baby is protected from cool air, and heating is enhanced. The hood can be chosen from summer type and four seasons type.

(Four Seasons Product)

(Summer Product)

02

Headrest

The head and the neck of the baby is supported to enable usage of the baby carrier and hipseat in proper posture, preventing the baby's head from drooping backward.

03

Wide Zipper Pocket

The wide zipper pocket attached on the waist belt allows the safe storage of cell phones and card wallets, allowing convenient usage in going out.

04

Mesh Inner Fabric

Mesh fabric outstanding in permeability and moisture permeability was used for the waist belt inner fabric for more fresh wear, and the waist belt pushing outward in long-term usage was minimized.

05

WOOJIN PLASTIC Waist Bucle

WOOJIN PLASTIC buckle with safety and outstanding quality is used.

06

Slide Chest Buckle

As the buckle fixing the two shoulder belts, the slide buckle of the shoulder belt could be adjusted according to the position the mother wants.

07

Wide Cushion Seat

The seat in which the baby sits on used high-elasticity HR foam to allow the baby to feel soft and comfortable even with long sittings.

08

Mesh Backrest

Rolling down the cover reveals a highly air permeable mesh panel. It is optimal for hot weathers and babies with much body heat

10

Stable Wide Velcro

The wide Velcro could be attached firmly, enhancing support to support the baby's waist firmly and effectively.

09

Prevention of the Legs Being Scratched

The soft organic fiber and cushion interior material prevents the baby's sensitive legs from being scratched.

11

Bib, spit pad

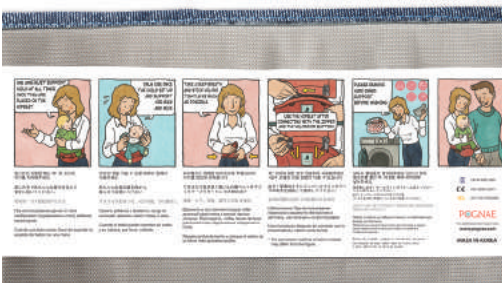

They are attached to the shoulder belts on the two sides and the headrest, allowing clean usage. Even if they are used for a long time with snap buttons, the shape is not deformed, not irritating the baby's face.

14

Illustrated Safety Warnings

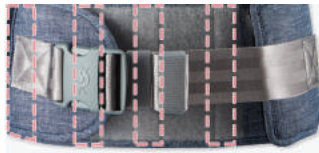

The warning was illustrated to be understood easily.

16

Silicon Non-slip Pad

Silicon with outstanding slip-prevention function was used on the hip seat, preventing the hip from slipping.

12

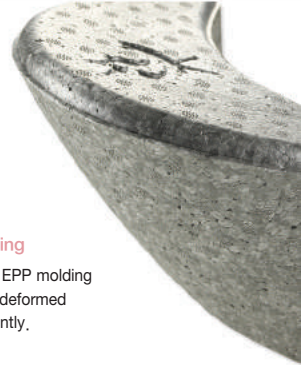

Waist Support

The four waist supports in the waist belt attaches along the user's waist curve, allowing the user to hold the baby for a long time comfortably.

13

Non-Toxic EPP Molding

Light and firm non-toxic EPP molding foam is used, not being deformed and used semi-permanently.

15

HR Foam Shoulder Belt

The HR foam of highest quality and highest have been used for the shoulder belt, having good cushion and recovery. Also, the user's shoulder pain is minimized and fatigue is alleviated without deformations, even with long usage.

No.5 Plus, made Safely with the Best Materials

Pognae creates proper products by prioritizing the health and safety of babies. We use finely selected materials from zipper to Velcro.

Pognae utilizes Velcro with OEKO-TEX Certificate

OEKO-TEX is a certification mark proving that there are no harmful substances within the fabric product. Certification is the most prestigious eco-friendly certification attributed to fabric products proper to be used by children of 3 years old and younger, limiting harmful substances of formaldehyde and heavy metals and proving that the product is proper for human bodies.

Pognae uses fabric manufactured from threads with GOTS certification,

GOTS is an international organic fiber standard created by IWG, an organization established by OTA of the United States, IVN of Germany, Soil Association of Great Britain and JOCA of Japan. No.5 Plus is made by fabric created from GOTS certified thread.

Pognae uses YKK, the most luxurious zipper in the world,

'Some zippers are simply luxurious'. We use YKK stop zipper with more than 50% of the world's market share.

Pognae Uses WOOJIN PLASTIC, No.1 Buckle in the World,

WOOJIN PLASTIC is a buckle company taking up 40% of the world's plastic buckle market, and is acknowledged for the world's best function and technology. It is incomparable to Chinese lower-priced buckles susceptible to shock and pressure.

How to Connect the No.5 Plus Baby Carrier

One, connect Zipper A1 and Zipper A2.

Two, connect Zipper B1 and Zipper B2 for finishing touches.

How to Connect the Baby Carrier Type Zipper

The detailed methods for connecting the zipper can be viewed from the video board at the Pognae Homepage (www.pognae.com)

When using as a baby carrier, connect the backrest zipper A1 and baby carrier waist belt zipper A2.

Zipper A1 and A2 have the longest lengths of all zippers

Zip up Zipper A1 and A2 to the end.

After zipping up the zipper to the end, twist the zipper handle inward until it is locked.

The lock function prevents the opening during usage. The cautions for connecting the zipper is on the page 18 of the written explanation.

After attaching the A Zipper, connect the remaining Zipper B1 and Zipper B2.

Connect Zipper B1 and B2 until the end.

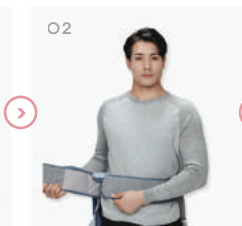

Likewise, twist the Zipper 2 inward like the photo to lock the zipper.
Completion of the baby carrier type

! The connection of the zipper for each type must combine both sets for the safety of the baby.

How to Wear No.5 Plus Baby Carrier

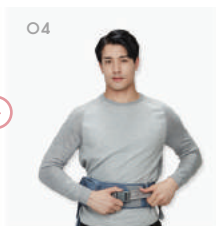

01 Put the baby carrier backwards, and place the waist belt on the pelvis.

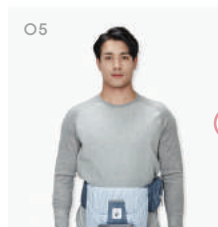

02 Breathe in deeply to attach the Velcro of the waist belt as tightly as possible.

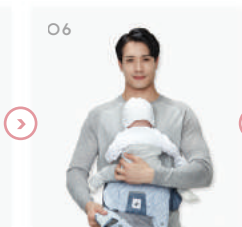

03 The upper and lower Velcro must be on each other perfectly to bear weight firmly.

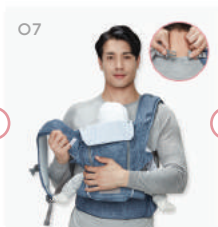

04 Lock the buckle and pull the waist belt.
The tighter the belt, the firmer the weight on the waist for more comfortable usage.

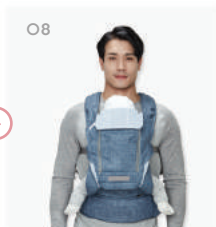

05 Turn the waist on the back to the front.

06 Place the baby on the seat.

07 Support the baby's back with one hand and put on the shoulder belt with the other hand.

08 Put on the remaining shoulder belt in the same method.
Check whether the baby is sitting properly

- Attach the Velcro on the waist belt and secure waist buckles.
- Place the baby carrier waist belt on the thin part of the waist, and lower the waist belt toward the pelvis.

Hugging

Holding on Back

How to Connect No.5 Plus Hipseat

One, connect Zipper A1 and Zipper A3.

Two, connect Zipper C1 and Zipper C2 for finishing touches.

How to Connect Hipseat Type Zipper

The detailed methods for connecting the zipper can be viewed from the video board at the Pognae Homepage (www.pognae.com)

Zip up backrest Zipper A1 and hipseat waist belt Zipper A3 until the end.

Zipper A1 and A3 is the longest of all zippers.

Connect Zipper A1 and Zipper A3 until the end.

Lock the zipper until the end, and twist the zipper handle inward to lock.

The lock function prevents the opening during usage. The cautions for connecting the zipper is on the page 18 of the written explanation.

The hidden Zipper C2 may be checked by raising the zipper cover at the front of the hipseat.

The hidden Zipper C1 may be checked by raising the zipper cover at the front of the backrest.

Connect Zipper C1 and Zipper C2.

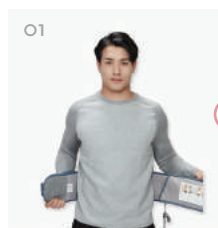

Likewise, twist the zipper handle of Zipper C to lock.

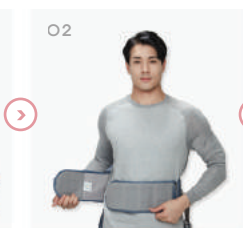

The lock function prevents the opening during usage. The cautions for connecting the zipper is on the page 18 of the written explanation.

! The zipper connection of each type must connect the two sets for the safety of the baby.

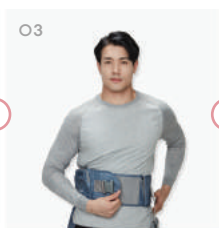

No.5 Plus Hipseat Usage method

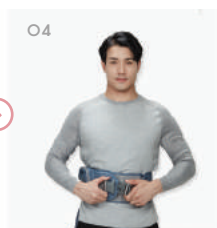

01 Place the hipseat to the back, and place the waist belt on the waist above the pelvis.

02 Breathe in as much as possible to connect the Velcro of the waist belt as tightly as possible.

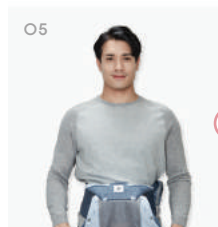

03 The upper and lower Velcro must be on each other perfectly to bear weight firmly.

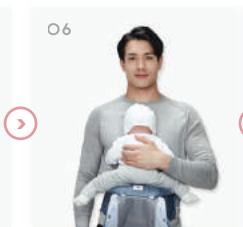

04 Lock the buckle and pull the waist belt.

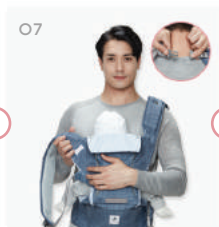

The tighter the belt, the firmer the weight on the waist for more comfortable usage.

05 Turn the waist on the back to the front.

06 Place the baby on the seat.

07 Support the baby's back with one hand and put on the shoulder belt with the other hand.

08 Put on the remaining shoulder belt in the same method.

Check whether the baby is sitting properly

- Attach the Velcro on the waist belt and secure waist buckles.
- If only the hipseat is used, wear the waist belt tightly on the thin waist.
- When using as hipseat carrier, place the waist belt on the thin part of the waist, and lower the waist belt slightly toward the pelvis.

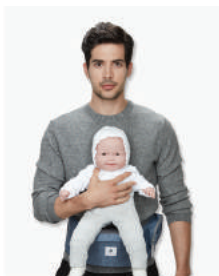

Various Uses of No.5 Plus Hipseat

Sling posture

Facing Each Other

Facing Front

Facing Front (Hipseat Carrier)

Hugging (Hipseat Carrier)

Holding on Back (Hipseat Carrier)

Recommended Usage for each Age

* The usage period of the product may differ according to the growth of the baby.

How to carry the baby on Newborn Support

Secure the waist belt of the baby carrier, and sit on a sofa to unfold the baby carrier on the mother's lap,

Attach the Velcro at the lower part of the Newborn Support and the center of the backrest,

Ensure that the two sides of the Velcro are in place,

Pull down the connected Newborn Support,

Place the baby on the backrest of the baby carrier,

Cover the Newborn Support pulled down over the baby,

Connect the hook attached to the Newborn Support to the ring of the backrest,

Connect the 4 hooks,

Check the baby's state,

! We recommend usage of New Born Support from infants who are 1 months old and older. Please support the baby with your arms until you are used to the usage. New Born Support could be used on baby carrier type. The product could be used in facing each other position only. (Never in back position)

How to take off the waist belt without making a noise

① Check the zipper attached diagonally on the waist belt,

② Open the zipper under the zipper cover,

③ Take the waist belt off without waking up the asleep baby,

! Place the asleep baby down before taking off the waist belt,

How to control the seat width

With the leg width widened
(Not applicable to the users of hipseat
carriers)

Move back the logo cover located at the
seat in which the baby is supposed to sit.

Fold one wing according to the sewing line,
as the above photo

Fold the remaining wing to fix the two wings
with the snap button

Take down the folded logo cover to attach
to the Velcro

With the leg width lessened
(When using the hipseat carrier, when the
baby carrier is facing front)

When should the seat width be adjusted?

Narrowed width

When to Use The Hipseat Carrier

When to Use The
Baby Carrier

Facing Front

Facing Each Other

Holding on Back

Facing Front

Widened width

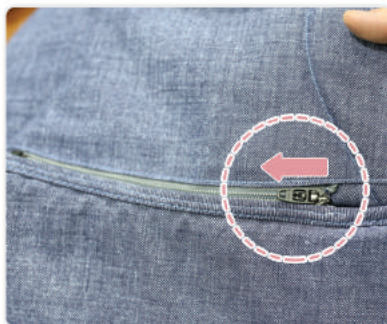

When to Use The
Baby Carrier

Facing Each Other

QR code

'The serial number tag is attached to the product.'

N⁺₅ CAUTION

✓ Cautions in Usage

"IMPORTANT! READ CAREFULLY AND KEEP FOR FUTURE REFERENCE"

WARNING – Your balance may be adversely affected by your movement and that of your child

WARNING – Take care when bending or leaning forward or sideways

WARNING – This carrier is not suitable for use during sporting activities The number and date of the European Standard, i.e. EN 13209–2:2015 A statement that, when using the soft carrier, to monitor your child A statement that, for low birthweight babies and children with medical conditions, to seek advice from a health professional before using the product A statement concerning an awareness of hazards in the domestic environment, e.g. heat sources, spilling of hot drinks, etc

- If the buckle or the sewing is damaged before usage, stop usage as there are hazards of accidents.
- Always verify whether all the buckles are connected properly.
- When holding the baby or carrying the baby on the back, the baby may fall if the waist belt is loosened, so put the baby down safely before loosening the waist belt.
- When using the hipseat only without backrest, put on the waist, not the pelvis.
- When connecting the hipseat and the backrest in connection, put on the hipseat on the waist, and put it down slightly to the pelvis.
- When the belt is worn loosely, it may burden the waist, back and shoulder. Wear the product tightly according to the body shape of the user.
- The waist belt must be worn with the Velcro on the front, not the back in order to attach the Velcro tightly and correctly.
- The two Velcro must be attached properly to support the baby.
- The user's hand must protect the baby at all times against hazards that may occur.
- When inexperienced with the usage, use on floor with cushion, or use by receiving the help of another person.
- Naps may occur when the Velcro touches the fabric of the product while putting on or storage.

✓ Cautions in Washing

Check the contents of the caution before washing.

The product cannot be exchanged or refunded from damages occurring from wrong washing and drying

- Because the organic cotton does not use harmful fixatives (synthesized substances to prevent the changing of the color), natural fading may occur after washing and drying. This is not a defect of the product, so repairs cannot be made.
- Make sure to take out the molding foam from the hipseat before washing.
- Make sure to wash by attaching all Velcro of the waist belt, and by locking the buckles.
- When washed without attaching the Velcro, fuzz may occur from damages of the fabric.
- Wash in cold water.
- Do not dip in water for long time, and do not wash with hot water or boil the product.
- Wash lightly with water.
- In drying, avoid UV lights and dry in shades with good air permeability.
- Wash small stains with wet towel by tapping or wash in part, and avoid machinery washing.
- Drying with drum washing machines and dryers may cause shrinking, damages and deformation of the product, so dry in the natural state.
- If alkali substances are included in the baby product detergents, it may be a cause for discoloration and bleaching, so make sure to use neutral detergents.
