

Note: Take care when opening to avoid damage to the surface of the pipe fittings. This product provides a natural rocking motion, so use caution when mounting and dismounting.

The product includes:

- 2 saddle tubes w/ elastic bands
- 2 rocker base tubes
- 1 handlebar
- 4 short screws
- 2 long screws
- 4 washers

1. Insert saddle support tube with elastic bands into rocker base tubes. Use short screws to fasten.
2. Insert the remaining saddle support tube into the other side of the rocker base tubes. Use remaining short screws.
3. Install the handlebar, taking care to stack the washers back to back. Fasten with long screws.

Tip: Gently twisting and tapping the frame body can help to align the holes for inserting screws.
