NOT INTENDED TO REPLACE VETERINARY ADVICE.

A FEW AREAS HEIGHTENED HEMP TARGETS:

- GENERAL ANTI-INFLAMMATORY
- HELPS COMBAT ARTHRITIS
- PROMOTES HEALTHY SKIN
- HEART HEALTH
- BRAIN HEALTH
- REDUCES SHEDDING
- HELPS DIABETIC NEUROPATHY
- ENHANCES THE IMMUNE SYSTEM
- HELPS TO BALANCE DIETS IN DOGS WHO CAN'T EAT POULTRY
- ENHANCES FERTILITY
- SUPPORTS HEALTHY ORGAN FUNCTION

The World Health Organization warns of dangerous levels of mercury being consumed through eating fish, and scientists are also monitoring dangerous radiation levels in Pacific Ocean fish. **There has never been a better time to consider Hemp oil's virtues!**

FISH OIL VS. HEMP OIL:

- most fish oil goes through a process of heating which can render it toxic
- fish oil is often bleached with industrial solvents and may contain PCBs or dioxins
- much of the fish oil that makes it to the food chain is rancid and can cause inflammation
- Hemp is the perfect ratio of EFAs and contains Vitamins D, E, A and cholesterol-fighting phytosterols
- Hemp contains sizeable amounts of Gamma-Linolenic Acid (GLA)
- Hemp is one of nature's richest sources of magnesium
- the creation of hemp oil does not threaten our oceans and is environmentally stable
