Care Instructions

Vacuum your rug using a low-powered vacuum cleaner, preferably one with a beater brush. Shedding of loose fibres will occur with new rugs. Use scissors to trim (do not pull) loose yarn to avoid unravelling. Occasional cleaning from professional rug-cleaning company is recommended. Avoid harsh chemicals that could damage or fade your rug. Clean spills promptly by blotting with a clean, undyed cloth. Avoid direct and continuous exposure to sunlight and rotate rug periodically to promote even wear. Use of a rug pad is recommended.
