# ABOUT US

WOODCHUCK USA manufactures technology-driven wood products and specializes in customization. WOODCHUCK USA was founded with a simple mission: putting nature back into people's lives. We are meant to have a deep connection with the Earth. Our passion is to be a daily reminder of our planet's vulnerability by using our real wood products and planting a tree with every product sold. Our way of making a better world for future generations is us bringing jobs back to America while bringing quality products to our consumers. It's not about us, it's about our planet and how we can make a difference now.

## OUR WHY

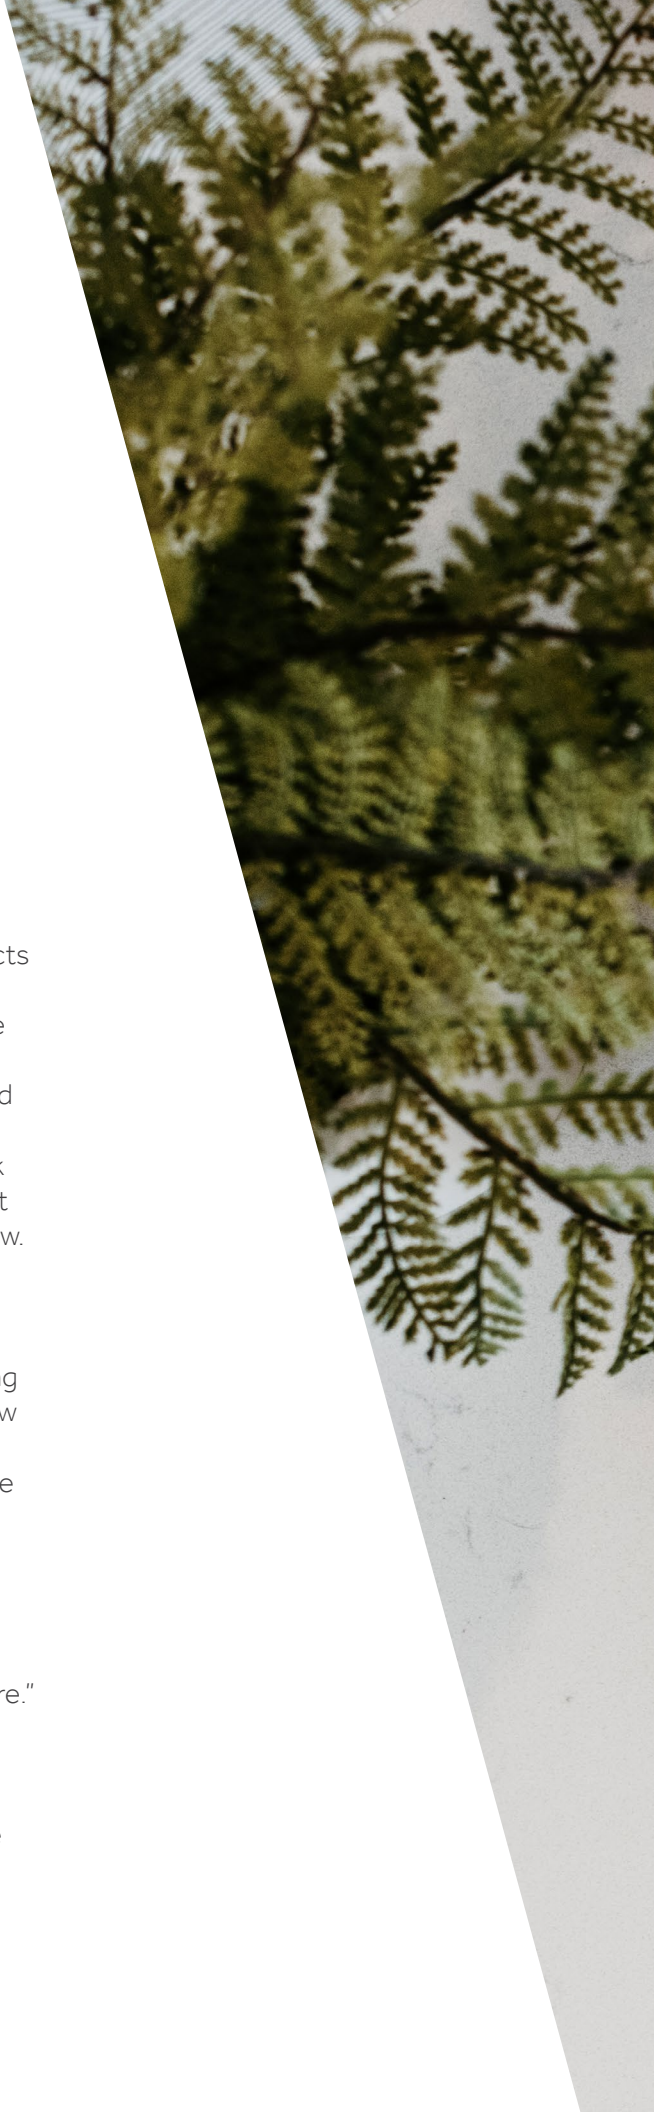

When we started this company, we decided that it would always be dedicated to a mission, rather than a product. That mission is putting nature back into people's lives. We constantly strive to figure out new and better ways to get people more connected with nature. We are here to leave the world a better place, to inspire others to experience the wonder of nature every day.

## BUY ONE. PLANT ONE.

We plant a tree for every product sold. Today, we have planted over three million trees between 6 continents. This program is a part of WOODCHUCK's vision to create a "World More Connected to Nature."

## OUR TEAM

We are dreamers, doers, and strategic thinkers. We are the people changing the world every day. We are consistently driven to improve and always elevating our mindset. In 2013, our manufacturing operation was a laser in a dorm room. Today, we employ over 30 full-time employees and produce in a world-class facility.
