Designed for savings, built for long life and engineered for performance. Based in Panama City, FL, B&C Technologies has focused on building a line of equipment designed to exceed the toughest standards while maintaining the lowest cost of ownership. Each B&C design begins with a solid frame and utilizes a simple design to ensure minimal downtime while maximizing savings and productivity. In addition to a complete line machines, B&C has an extensive parts department, easily accessible technical support and unparalleled customer service. We offer personal care and will never have a corporate feeling. Discover the difference being a part of the B&C family makes.

Washers

HE Series - Efficiency high speed hardmount (35-110 lbs)

HP Series - Professional ultra high speed hardmount (65-125 lbs)

SP Series - Professional ultra high speed softmount (45-195 lbs)

SA Series - Automatic large capacity industrial softmount (275-475 lbs)

SI Series - Dependable large capacity industrial softmount (110-300 lbs)

SB Series - Barrier antiseptic medium to large softmount (60-485 lbs)

The B&C Technologies line of washer-extractors are designed to be effortless and powerful while maintaining a low cost of ownership. Our entire line saves you money over the life of the machine. In addition to a low initial investment, our machines have fewer parts, meaning less down time for the equipment and fewer repairs.

Flatwork Ironers

IP Series - 14 inch heated chrome plated roll diameter, 78-100 inch working width

IS Series - 14, 18, 24, or 32 inch heated chrome plated roll diameter; 120 or 130 inch working width

IF Series - 24 or 32 inch heated roll diameter, 130 inch working width with optional folder/feeder/stacker

IM Series - 32 or 48 inch roll deep chest ironer with 1, 2, 3, or 4 roll modules.

The B&C line of ironers provides you with outstanding performance at the lowest price. Increased efficiency, fewer parts, and low maintenance help save you money.

Tumble Dryers

DE Series - Efficiency dryers (30-190 lbs)

DP Series - Professional dryers (200-250 lbs)

DI Series - Industrial dryers (225-475 lbs)

B&C Technologies offers the most rugged dryers in the industry. Easy installation saves you money and time so you can have your laundry up and running in a matter of hours. Engineered and manufactured with installation in mind, these sturdy dryers use welded steel cabinets and heavy duty steel bases that can be easily moved without damaging the machine.

Cabinet Dryers

FC Series - Fireman's drying cabinet, holds 6 sets of PPE

TS Series - Professional drying cabinet, holds 20 or 32 lbs

Drying cabinets dry efficiently without mechanical action at exactly the right temperature and humidity and are ideal for articles not suitable for tumble dryers as well as special processes like wetcleaning. Gentle drying action leads directly to longer fabric life, as the goods are not tumbling against each other or against the drying cylinder.

Flatwork & Small Piece Folders

PF Series - Small piece folder for towels, bath mats, garments and more

PS Series - Flatwork folder with optional stacker

PD Series - Flatwork feeder in 1, 2, or 3 stations

B&C Technologies offers a full line of finishing equipment to meet the demands of your commercial or industrial laundry. B&C has flatwork feeding/ironing/folding/stacking systems for nearly any production requirement plus small piece folding.

BioSpin Ozone System

The BioSpin process uses low voltage DC current and tap water to generate ozone, allowing large amounts of ozone to be processed without producing by-products. The mixing pump, used to ozonate the water, is able to efficiently dissolve ozone into water and transfer to the wash solution without the outgassing and smell common in other systems. Easy installation makes the BioSpin system a quick addition to any laundry that can benefit from the ozone sanitization process.

“The equipment is a solid, cost effective and hassle free solution for our laundry needs and it stood the test of time; the last ten years we’ve had good performance out of the equipment for the people that have to use it every day.”

**Brooke Christianson
Vice President
Canalta Hotels**

“Our SI-275 is absolutely the best machine we have. I wish I had more of them to replace all of my existing machines. Thank you so much!”

**Sal McGhee
Service Stars**

“After we replaced a different brand of washers with B&C equipment, we found them to be so reliable and dependable that they are now our preferred choice for all our laundries.”

**Brad Carroll
MCM Elegante**
