NON-RESETTABLE COUNTER PACKAGES

RESETTABLE COUNTER PACKAGES

## Track your Change Machine Transactions

Standard Change-Makers **NEW** Modular Series Changers now have Counter Audit Packages available as part of our Modular "Plug & Play" design. This module features Non-resettable and Resettable Counters, or a combination of both, that allow you to audit the **BILLS IN** and **COINS OUT** of your changer transactions.

The MC Counter Kits can be used to count **BILLS IN** or **COINS OUT** simply by plugging into the proper socket on the Modular *Smart Hopper* Control Board (located at the front of the hopper base). The kits consists of one or two galvanized steel mounting brackets, one or two counters per bracket, and applicable cables. The brackets can either be attached to an available stud or with industrial strength two-sided tape (supplied with the kit).

You may also purchase a combination of Resettable and Non-resettable Counter Kits.

See the chart for recommended options!

A Resettable **BILLS IN** Counter mounted to the door of an MC200, next to the Bill Acceptor.
