

# SYSTEM 600 Series

## Front Load Change Machines

SC61 & SC62

SC43 & SC44

SC42-DA & SC44-DA

## The Workhorses of the Industry! Excellent Reliability & Value

**Standard Change-Makers' System 600 Series** change machines are designed and built to handle high volume coin dispensing applications. If your self-service business has heavy traffic, you need a changer that not only can handle the workload; but will also provide the security and peace of mind that your investment is protected.

The System 600 Series changers have our **System 600-EF** Bill Validator that features high performance optical & magnetic sensors, and a handheld data terminal that allows you to control: Security levels of bill acceptance, determine fast vend shut-off rules and view audit data (such as last 20 bills accepted, and total coins dispensed from each hopper, etc.). The System 600-EF Validator also utilizes our 1-, 2- or 3-Box Separating Stacker mechanism - that separates different denomination bills from each other (*availability dependent upon model*).

The System 600 Series changers have rugged, solid welded steel cabinets with two crank locks. Each machine comes with Standard's galvanized steel, direct drive motorized Hoppers -- considered the most reliable and longest lasting hoppers in the industry.

### SYSTEM 600 SERIES FEATURES:

**Bill Acceptor(s):** SCM System 600-EF

**Bill Stacker Capacity:** 800 Bills per Stacker Box  
(1-Box Stackers & 2- or 3-Box Separating Stackers, depending on model)

**Hopper(s):** Steel Construction with Direct Drive Motor

**Hopper Capacity:** \$800 or 3,200 Quarters per Hopper  
(From 1 up to 4 Hoppers per machine - depending on model)

**Cabinet:** Solid-welded Steel (no rivets or spot welds), finished in high gloss Powder-Coat enamel paint (Black or Soft Gray)

**Graphics:** Scratch-resistant, applied Lexan™

**Locks:** Two Crank Locks with Medeco™ lock plugs

- **Proven Design** - The SC Series machines were originally introduced in the 1980's. Many of these machines are still in service today!
- **Easy Maintenance** - no special tools - simply use air to blow dust and lint from hopper mechanism and bill path of validator. Clean damp cloth to clean optics.
- **Hopper Transfer** is automatic on sold-out or error conditions
- **Switching Power Supply** generates less heat - which adds longer life and better performance
- **Maximum Security** - built with heavy duty materials, with high volume and high security in mind!
- **Handheld Data Terminal** - allows you to check audits, set security levels & troubleshoot problems quickly and easily
- **Motor Driven Hopper** - no plastic or rubber belts or chains
- **Two Year Limited Warranty**
