

SC-MAX

Conversion Kits

for System 500 & System 600 Series Bill Acceptors

**easy
installation**

**economical
solution**

Standard Change-Makers, Inc. introduces the **SC-MAX Conversion Kit** that allows for the conversion of older System 500, System 500-E, and System 600 bill acceptors to newer OEM style bill acceptors - such as Coinco and Mars.

The SC-MAX Conversion Kit is intended for older machines with a long service life. Although the machine's cabinetry, coin dispensers and other components are still operating efficiently, the aging bill acceptor may require more frequent repairs or maintenance.

The SC-MAX Conversion Kit comes complete with everything needed to make the conversion, including cables, brackets, hardware, instructions, and your choice of either a Mars (MEI) or Coinco Vantage bill acceptor. The kit also includes the SC-MAX Controller, that operates just like the SC Series Keypad or Data Terminal in providing programming, diagnostic and audit reporting functions.

 **coinco**
