Rear Load Change Machines

SC21RL & SC22RL

SC33RL & SC34RL

SC32RL-DA & SC34RL-DA

The Workhorses of the Industry! Flexibility and High Performance

Standard Change-Makers' System 600 Series Change Machines are built to handle high volume coin dispensing applications. If your self-service business has heavy traffic, you need a changer that can handle the workload, and provide you with the security and peace of mind that your investment is protected.

The System 600 series changers have our System 600-EF Bill Validator that feature high performance optical & magnetic sensors, and a handheld data terminal that allows you to control security levels of bill acceptance, determine fast vend shut-off rules and view audit data (such as last 20 bills accepted, and total coins dispensed from each hopper, etc.). The System 600-EF Validator uses our 1-, 2- or 3-Box Separating Stacker mechanism - that separates different denomination bills from each other (*availability dependent upon model*).

The System 600 Series changers have rugged, solid welded steel cabinets with two crank locks. Each machine comes with Standard's galvanized steel, direct drive motorized Hoppers -- considered the most reliable and longest lasting hoppers in the industry.

SYSTEM 600 SERIES FEATURES:

- Bill Acceptor(s):** SCM System 600-EF
- Bill Stacker Capacity:** 800 Bills per Stacker Box
(1-Box Stackers & 2- or 3-Box Separating Stackers, depending on model)
- Hopper(s):** Steel Construction with Direct Drive Motor
- Hopper Capacity:** \$800 or 3,200 Quarters per Hopper
(From 1 up to 4 Hoppers per machine - depending on model)
- Cabinet:** Solid-welded Steel (no rivets or spot welds), finished in high gloss Powder-Coat enamel paint
- Graphics:** Scratch-resistant Lexan™
- Locks:** Two Crank Locks with Medeco™ plugs
- ETL Certified Machine**

- **Proven Design** - The SC Series machines were originally introduced in the 1980's. Many of these machines are still in service today.
- **Easy Maintenance** - no special tools - simply use air to blow dust and lint from hopper mechanism and bill path of validator. Clean damp cloth to clean optics.
- **Hopper Transfer** is automatic on sold-out or error conditions
- **Switching Power Supply** generates less heat - which adds longer life and better performance
- **Maximum Security** - built with heavy duty materials, with high volume and high security in mind!
- **Handheld Data Terminal** - allows you to check audits, set security levels & troubleshoot problems quickly and easily
- **Motor Driven Hopper** - no need for belts or chains
- **Two Year Limited Warranty**
