

Pre Box S2

03.2018

I'm impressed...

Watch the Video

It sounded quite dynamic
and had a rather clean
midrange ...
... and also the lows
offered tonality and
resolution that is good ...

The stereo image is
somewhat wide ...

... featurewise it
outperformed

comparable units.
The remote control lets
you control everything.

Build quality both outside
and in are more than
excellent... it's a steal.
