

Kawasaki Versys 2010 & up, and ER6-N Mirror Extenders Installation Instructions

- 1) Slide the rubber cap up to expose the screw on the mirror as shown

- 2) Using a **14 mm wrench**, unscrew the mirror with a counterclockwise motion.
- 3) Screw the mirror to the mirror extender's threaded hole as shown and use force to tighten it by hand.

- 4) Use the **6 mm Allen wrench** (8mm if purchased before 01/13/2010) to screw the mirror extender to the handle bar with the black hex screw provided

- 5) Using two **14 mm wrenches** (or one adjustable and one 14 mm wrench) hold the bottom nut and turn the top nut clockwise to loosen it up.

**Warning:
Left thread!**

Next, adjust the mirror's position to your liking and re-tighten the top nut by turning it counterclockwise this time.

- 6) Slide the rubber cover down.
- 7) Repeat these steps for the other mirror. **The installation is completed.**
