

2015-16 Kawasaki Versys 650 Mirror Extenders Installation Instructions

1. Slide the rubber cap up to expose the screw on the mirror assembly as shown

2. Using a 14 mm wrench on the lower nut, unscrew the mirror with a **counterclockwise motion**. You may need to twist the handle bar to do it, so as not to hit the windscreen

3. Screw the mirror assembly into the mirror extender's threaded hole, as shown.

4. Use the **6 mm Allen hex wrench** to screw the mirror extender to the handle bar with the black hex screw provided.

5. Next, force/adjust the mirror into the new position. Then, use two 14 mm wrenches to re-tighten the mirror assembly nuts.

6. Slide the rubber cap down. Repeat the same steps on the other mirror assembly.
