

## 2017 Kawasaki Versys X300 Mirror Extenders Installation Instructions

### Provided

2 Custom, black anodized  
aluminum screws

Left Extender (engraved)

Right Extender

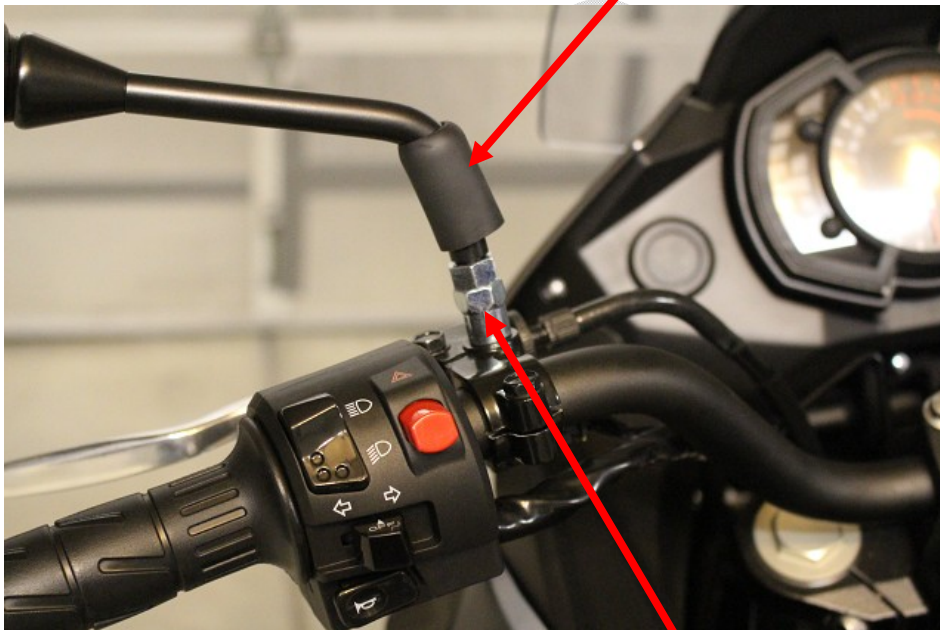

### From your garage

14 mm open wrench

6 mm Allen (hex) wrench \*

*\* provided with extenders*

1) Starting with the left side, slide the rubber cap up to expose the screw on the mirror, as shown.

2) Using a 14 mm open wrench, unscrew the **lower nut** of the mirror with a **counterclockwise** motion. Take out the entire mirror assembly.

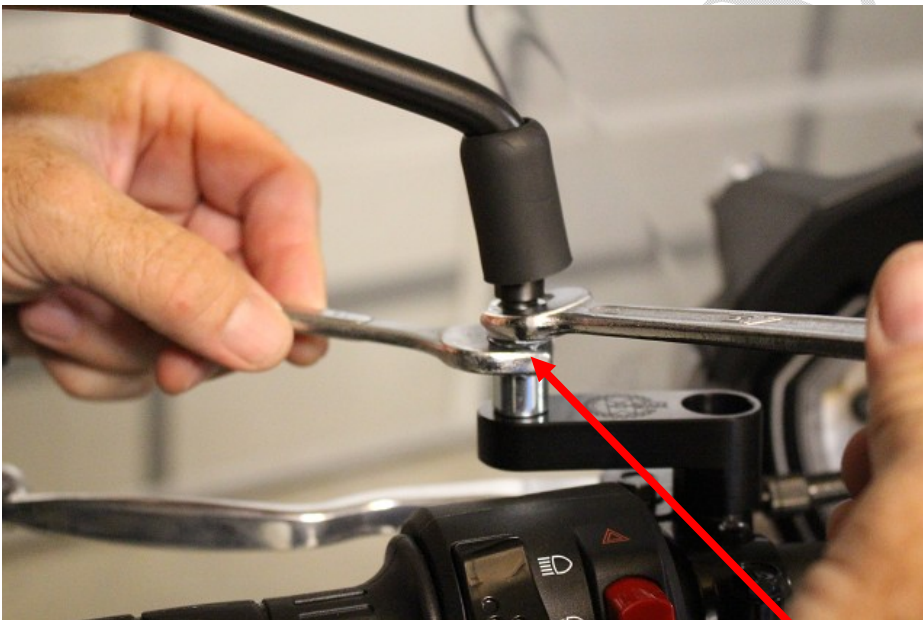

3) Screw the mirror into the mirror extender's threaded hole, as shown.

4) Use the **6 mm Allen wrench** to screw the mirror extender to the handle bar with the black custom hex screw provided.

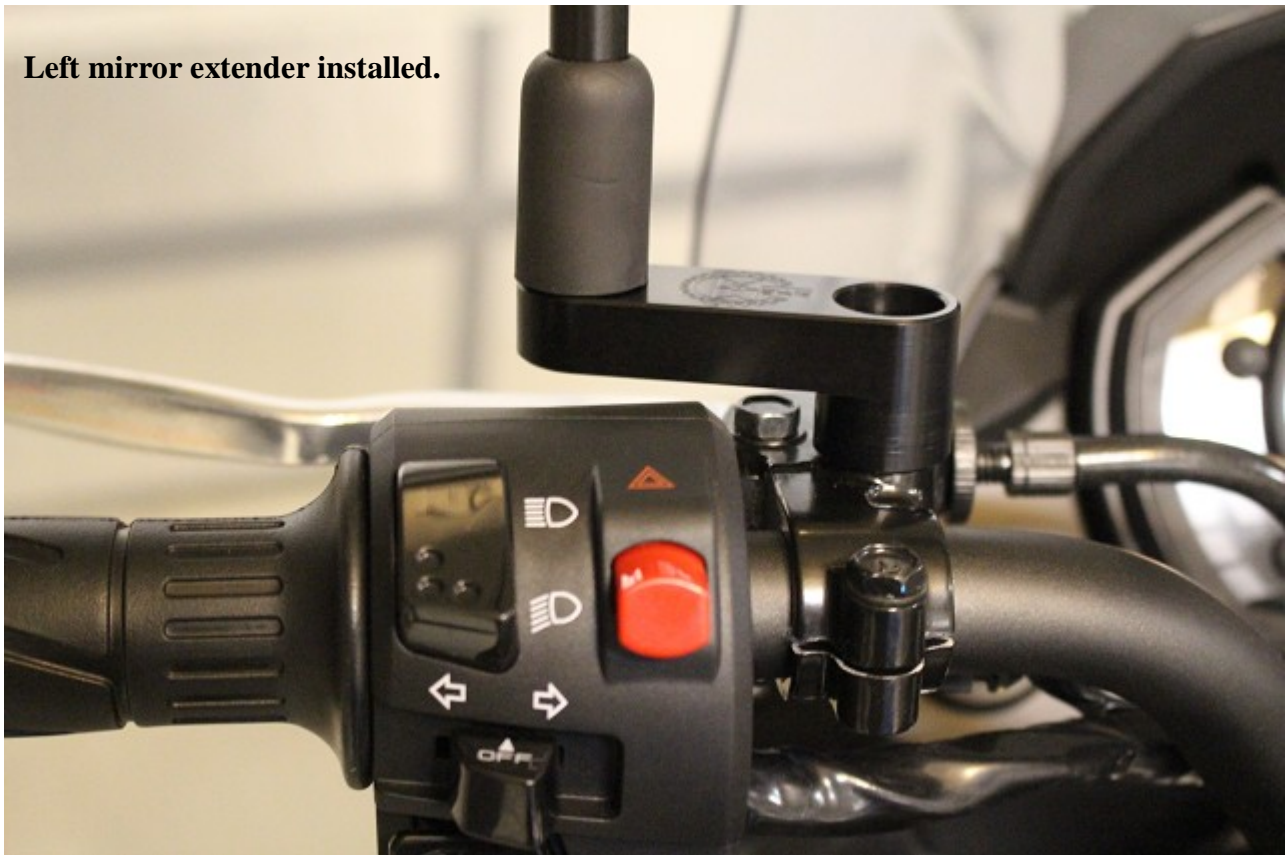

Now, use the 14 mm open wrench to tighten the **lower nut** of the mirror with a **clockwise** motion.

To adjust the mirror's position, use the 14 mm open wrench **to loosen up** the **upper nut** of the mirror with a **clockwise** motion.

Adjust the mirror's position to your liking and **tighten** the **upper nut** with a **counterclockwise** motion. Slide the rubber cap back down.

5) Repeat these steps with the right mirror.

**Left mirror extender installed.**

**Right mirror extender installed.**
