

# Canada Flag Inlay Kit Instructions

## Kit components

- 1: 1 x Maple Barrel with laser cutout
- 2: Red Maple leave inlay pieces.
- 3: Red Maple end Barrel pieces.

### Step 1:

Remove all components from the plastic bag and place on a clean work surface. Please note that the components are small and you can lose them quite easily.

### Step 2:

Take the barrel with the laser cutout and slide the brass tube(27/64) into it. **Please do not use any glue** at this stage, this is only to assist you with the assembly process.

### Step 3:

Take the Barrel with cutout and place the inlay into the opening .

Place Red Maple leave inlay into the opening ( See page two).

**Press the top of the Red Maple leave into the opening first** and then press roll it into place with your thumb or with a piece of wood.

You can use a little bit of water and wet the inlay before you press it in.

Now you can slide the barrel with the inlay/ Inlays onto a brass tube and then slide the two remaining Red barrels from both side onto the brass tube.

Apply a small amount of thin CA glue so it would stick to the main barrel. You can use CA accelerator to speed up the curing of the CA glue.

### Step 5

Remove the brass tube and put a small drop of thin CA on each inserted part.

### Step 6

Now you can trim / cut / sand the barrel to size and glue the brass tube into the barrel with a glue of your choice and please give it enough time to dry before turning the barrel into shape. Try to sand the barrel round and smooth before you use a skew or any other tool to finish your pen.
